Steel Rack Blanking Panels 14-Gauge Solid Rack Filler Panels *PBPS Series*

Solid steel rack panels designed to cover unused rack space and improve airflow efficiency in rack systems.

EIA STANDARDS

MANUFACTURED IN NORTH AMERICA

RoHS

Key Features and Benefits

- 14-gauge steel construction provides durable rack space coverage and airflow control in high-density environments.
- Designed to install in unused rack space to improve cooling efficiency and prevent air recirculation.
- Solid panel design blocks airflow gaps, supporting proper front-to-rear cooling.
- Fits standard 19 in EIA-compliant rack rails for universal compatibility.
- Available in multiple heights (1U–10U+) to match rack configurations.
- Smooth powder coat finish provides a clean, professional appearance.
- Multiple color options available to match rack environments.
- Helps improve rack organization and equipment separation.
- TAA-compliant, manufactured in North America within an ISO 9001 certified facility.
- Powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The PBPS Series steel rack blanking panels provide a reliable solution for covering unused rack space while improving airflow and cooling efficiency. Designed with a solid steel construction, they help prevent hot and cold air mixing in rack environments. By blocking open rack units, the PBPS Series supports proper thermal management, improved system performance, and a clean, organized installation in data centers and network environments.

Where the PBPS Series Works Best

- Data centers and server rooms
- Telecom and network installations
- High-density rack environments
- Hot aisle / cold aisle containment systems
- Wall mount and floor-standing racks

Best Applications for the PBPS Series

- Covering unused rack space to improve airflow
- Preventing hot and cold air recirculation
- Enhancing cooling efficiency in rack systems
- Improving rack organization and appearance
- Supporting thermal management strategies
