### PRODUCT FEATURES

- Ethernet enable RS-232/422/485 serial devices
- Direct IP, virtual COM port or paired mode
- Industrial 10 - 48 VDC input power
- Wide operating temperature – -40 to +80 °C
- UL Class 1/Division 2
- Ethernet pass-through port optional (VESR92x models)
- NEMA TS2 (VESR901 model)

Take control of your serial devices with Vlinx™ VESR9xx Industrial Ethernet Serial Servers. If it has a serial port, it can be monitored and controlled from anywhere on your Ethernet LAN or WAN. Keep at maximum productivity without leaving your office. Even troubleshoot it from outside your LAN via the internet. The easy-to-use Vlinx™ Manager software puts access to your entire factory floor on your desk. Configure devices, upgrade firmware and monitor activity. Configuration changes can also be made using a web browser.

The VESR92x Series also features an additional copper RJ45 port that allows you to connect another Ethernet device or PC work-station. This pass-through port functions much like an unmanaged switch.

Heartbeat connectivity keeps the serial server online. If connectivity is lost, it attempts to reconnect every five seconds until connection is regained. A manual reboot is not needed when communications are restored.

Fiber options are also available - contact B+B SmartWorx.
