Digi TransPort® LR54 is a high-speed LTE Advanced networking platform designed for retail, commercial and managed networking applications across distributed enterprises. Each device features an LTE Advanced CAT6 modem with speeds up to 300 Mbps and support for global deployments with a single hardware version, as well as a 4-port Gigabit Ethernet switch and serial port for console access. The routers include license-free enterprise software features like VPN, firewall and SNMP.

The two FIPS models make use of an embedded FIPS 140-2 validated cryptographic module for all encryption and authentication functions. The LR54 FIPS model is often used as a VPN gateway to bridge local private subnets through public or untrusted networks, ensuring message privacy and integrity.

The Wi-Fi variant features dual-band, dual-concurrent 5 GHz and 2.4 GHz radios, personal/enterprise security, and multiple SSIDs for maximum range and throughput performance in M2M applications.

Digi TransPort LR54 is ideal for connecting:
- Retail branch sites
- Self-service kiosks
- Remote offices/equipment
- Digital media installations
- Security monitoring equipment
- Guest and employee Wi-Fi users

**FEATURES AND BENEFITS**
- High-speed LTE Advanced for digital content and business networking applications
- Powerful dual Wi-Fi radios provide 802.11 b/g/n/ac connection to local users and end devices
- Automated fail-over/fail-back between Ethernet, Cellular (dual SIMs), and IPsec tunnels
- Enables compliance with NIST SP 800-171 requirement for FIPS-validated cryptography
- On-board Python environment for custom application programming
- Digi Remote Manager® provides mass configuration, device management and troubleshooting tools

****Digi Foundations can extend the standard three-year warranty to a Limited Lifetime Warranty that provides replacement with a new or similar Digi product for a period of five years from the data of purchase. After five years from the purchase date, the warranty value will revert to a 40 percent credit towards the MSRP of an equivalent product from Digi.
CAPABILITIES
- Centralized management of remote devices over 3G/4G LTE
- Define standard configurations and automatically monitor individual devices for PCI security compliance
- Report and alert on performance statistics, including connection history, signal quality, latency, data usage and packet loss
- No servers or applications to operate and maintain
- Complete tasks for your entire device network in minutes
- Edit configurations and update firmware for your individual devices or groups
- Monitor the status and location of your remote device via a web browser
- Active or deactivate cellular lines and monitor data to ensure you never incur overage charges

SECURITY
- Certified SSAE-16 facilities
- Member of the Cloud Security Alliance
- Over 175 Security Controls in place to protect your data
- Enables compliance with security frameworks like PCI, HIPAA, NIST and more
- Earned SkyHigh’s Cloud Trust Program highest ranking of Enterprise-Ready

INFRASTRUCTURE
- Hosted in a commercial-grade SAS 70-certified environment
- Superior availability, operating to 99.9% or greater
- Open APIs available to support application development
