Why Choose KEMET

KEMET Electronics Corporation is a leading global supplier of electronic components. We offer our customers the broadest selection of capacitor technologies in the industry, along with an expanding range of electromechanical devices, electromagnetic compatibility solutions and supercapacitors. Our vision is to be the preferred supplier of electronic component solutions for customers demanding the highest standards of quality, delivery and service.

Features & Benefits

• Eliminates soldering process problems
• Meets BS EN 60352-5:2012
• Compact size
• Reliable electrical contacts
• High ripple current
• Excellent surge voltage capability
• Customized spacing of press-fit connections
• Quick exchange of components

Product Checklist

• What is the pin configuration required?
• What are the operational conditions of your application? Do you have a specification available?
  – What is the applied voltage VDC?
  – What is the operational temperature?
  – What is the applied ripple current spectrum?
  – What life expectancy is required?
  – What are the end of life criteria?
• Does the application have size constraints? If so, what are they?
• Does the application require UL recognized sleeving?

Applications

• Uninterruptible power supply (UPS)
• Switch mode power supplies (SMPS)
• Smoothing
• Energy storage
• Demanding power supplies
• Frequency inverters

Press-Fit Male/Female Interconnects

Insertion/Retention Forces
Tests performed on 4 and 5 pin press-fit decks show a consistent insertion force of 100 N per pin.

• 4 pin press-fit deck requires 400 N insertion force
• 5 pin press-fit deck requires 500 N insertion force

A force > 500 N has been repeatedly applied to the finished product (4 pin version).
