This cable is used to connect, for example, a Pepper 43C board, to the iRobot Create 2 serial port.

The cable has a Mini DIN 7 serial port on one end, while the other end contains:

- A jack that can connect to the battery port of, for example, a Pepper 43C board.
- A jack that can connect to a data port of, for example, a Pepper 43C board that can control the iRobot Create 2.
