Features
- Two channel quadrature output
- Bushing or servo mount
- Square wave signal
- Small size
- Resolution to 256 PPR
- CMOS and TTL compatible
- Long life
- Ball bearing option for high operating speed up to 3000 rpm
- RoHS compliant

EN - Rotary Optical Encoder

Electrical Characteristics
- Output: 2-bit quadrature code, Channel A leads Channel B by 90° (electrical) with clockwise rotation
- Resolution: 25 to 256 cycles per revolution
- Insulated Input 200 VDC, 1,000 megohms
- Electrical Travel: Continuous
- Supply Voltage: 5.0 VDC ±0.25 VDC
- Supply Current: 26 mA maximum
- Output Voltage
  - Low Output: 0.8 V maximum
  - High Output: 4 V minimum
- Output Current
  - Low Output: 25 mA maximum
- Rise/Fall Time: 200 ns maximum
- Shaft RPM (Ball Bearing): 3,000 rpm (typical)
- Power Consumption: 136 mW maximum
- Pulse Width (Electrical Degrees, Each Channel): 180° ±45° typ.
- Pulse Width (Index Channel): 360° ±90°
- Phase (Electrical Degrees, Channel A to Channel B): 90° ±45° typ.
- Low Output Voltage
  - 0.8 V maximum
- High Output Voltage
  - 4 V minimum
- Output Current
  - Low Output: 25 mA maximum
- Rise/Fall Time: 200 ns maximum
- Shaft RPM (Ball Bearing): 3,000 rpm (typical)
- Power Consumption: 136 mW maximum
- Pulse Width (Electrical Degrees, Each Channel): 180° ±45° typ.
- Pulse Width (Index Channel): 360° ±90°
- Phase (Electrical Degrees, Channel A to Channel B): 90° ±45° typ.

Environmental Characteristics
- Operating Temperature Range: -40 °C to +75 °C (-40 °F to +167 °F)
- Storage Temperature Range: -40 °C to +85 °C (-40 °F to +185 °F)
- Humidity: 95% RH noncondensing
- Shock: 50 G
- Rotational Life
  - A & C Bushings (300 rpm maximum)*: 10,000,000 revolutions
  - W, S & T Bushings (3,000 rpm maximum)**: 200,000,000 revolutions
- IP Rating: IP 40

Mechanical Characteristics
- Mechanical Angle: 360° Continuous
- Torque (Starting and Running)
  - A & C Bushings (Spring Loaded for Optimum Feel): 0.07 N-cm (0.1 oz-in.) maximum
  - Shaft End Play: 0.30 mm (0.012") T.I.R. maximum
- Soldering Condition
  - Manual Soldering: 96.5Sn/3.0Ag/0.5Cu solid wire or no-clean rosin cored wire
  - Wave Soldering: 96.5Sn/3.0Ag/0.5Cu solder with no-clean flux

Wash processes: Not recommended

Manual Soldering: Manufacturer’s trademark, name, part number, and date code.

Hardware: One lockwasher and one mounting nut supplied with each encoder, except on servo mount versions.

**For resolutions ≤ 128 quadrature cycles per shaft revolution.

GENERAL INFORMATION
The Bourns® EN model is a self-contained rotary optical encoder. It produces a 2-bit quadrature signal which is suitable for digital systems where both magnitude and direction of adjustment must be provided. The EN encoder is ideal for use as a digital panel control or as a position sensing device in applications where long life, reliability, high resolution and precise linearity are critical.

The EN series encoder converts rotary input into electrical signals which can be used by microprocessors without A/D conversion.

Bourns encoder output signals are square wave digital pulses which do not require debounce circuitry. Both features make it possible to significantly reduce the memory overhead, wiring and wiring interconnects required by other types of control devices.

EN optical encoders offer a useful rotational life of from 10 million to 200 million shaft revolutions, making them ideal for extended service applications. The Bourns encoder is also compact and well suited for situations where the available space is limited.
