AVAILABILITY: IN STOCK

30 DAY MONEY BACK GUARANTEE *SOME EXCEPTIONS APPLY

WARRANTY: 1 YEAR COMPREHENSIVE SUPPORT FOR ALL PRODUCTS

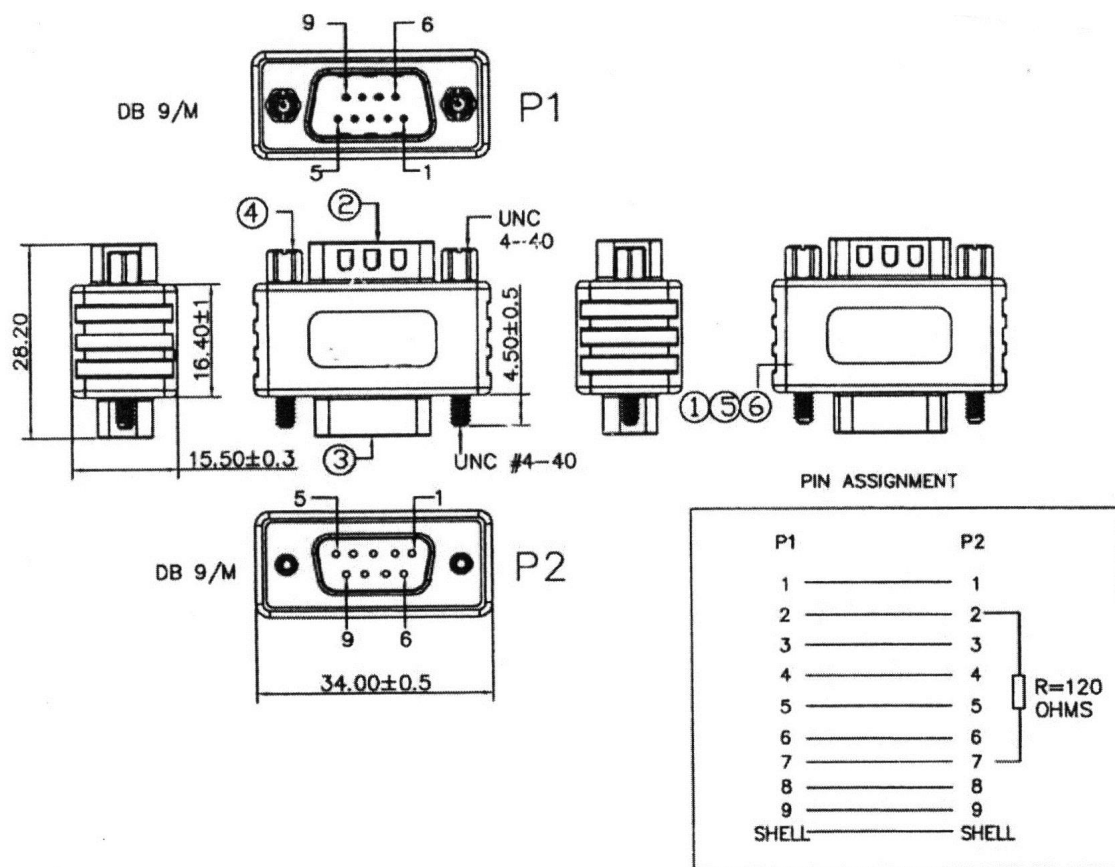

DESCRIPTION

Terminate a high-speed CAN (Controller Area Network) bus with the CAN Terminator. This CAN Terminator consists of a 9-pin D-Sub connector (male), a 9-pin D-Sub socket (female), and a 120 Ohm termination resistor.

All CAN networks need two terminators; one at each end of the network. The CAN Terminator can be used where the CAN cable or CAN node at the end does not have internal termination.
