

eMMC — the perfect storage solution for mobile and embedded applications

Overview

Kingston A19nm eMMC™ Flash memory follows the JEDEC eMMC 5.0 standard and encloses the MLC NAND and eMMC controller inside one JEDEC standard package to provide a standard interface to the host CPU. The eMMC controller directs the Flash management, including ECC, wear-leveling, IOPS optimization and read sensing, significantly reducing the storage management burden on the host CPU. A universal storage solution, Kingston A19 eMMC is ideal for many electronic devices, including: smartphones, tablet PCs, PDAs, eBook readers, MIDs, digital cameras and recorders, MP3, MP4 players, electronic learning products, digital TVs and set-top boxes. Beyond its use in consumer products, eMMC is being rapidly adopted in embedded applications, such as many Computer on Module (COM) designs, because of its compact size, low-power consumption and many enhanced features.

Key Benefits

- Simplifies system design and reduces time to market. The standard interface makes fast-changing NAND technology invisible to the host and the host processor doesn't have to keep changing its software to accommodate every NAND technology change and variation. This helps to significantly reduce the design-in complexity and shorten the qualification cycle.
- Helps to improve whole system performance. The eMMC controller frees up the host processor's valuable resources from NAND management so the host processor can use its processing power on other tasks.
- Provides a cost-effective solution. As opposed to SLC NAND, eMMC uses MLC NAND so it makes higher capacity storage in mobile devices much more affordable and enables today's mobile devices to meet increasing demands for storage.

A19 eMMC Part Numbers and Specifications

Part Number	Capacity	Description	eMMC Standard	Package	Category
EMMC04G-S100	4GB	eMMC 5.0 (HS200) 153B 4GB	5.0 (HS200)	11.5x13x1.0	Standard
EMMC08G-S100	8GB	eMMC 5.0 (HS200) 153B 8GB	5.0 (HS200)	11.5x13x1.0	Standard
EMMC16G-S100	16GB	eMMC 5.0 (HS200) 153B 16GB	5.0 (HS200)	11.5x13x1.0	Standard
EMMC16G-S110	16GB	eMMC 5.0 (HS200) 153B 16GB	5.0 (HS200)	11.5x13x1.0	Standard
EMMC32G-S100	32GB	eMMC 5.0 (HS200) 153B 32GB	5.0 (HS200)	11.5x13x1.0	Standard
EMMC16G-E100	16GB	eMMC 5.0 (HS400) 153B 16GB	5.0 (HS400)	11.5x13x1.0	Elite
EMMC32G-E100	32GB	eMMC 5.0 (HS400) 153B 32GB	5.0 (HS400)	11.5x13x1.0	Elite
EMMC64G-E100	64GB	eMMC 5.0 (HS400) 153B 64GB	5.0 (HS400)	11.5x13x1.4	Elite

Key Features

JEDEC Standard Features	eMMC 5.0
Boot Operation	√
Partitioning	√
Sleep Mode	√
Replay Protected Memory Block	√
Secure Trim/Secure Erase	√
Hardware Reset	√
Reliable Write	√
Background Operation	√
High Priority Interrupt	√
DDR Interface	√
Discard/Sanitize CMD	√
Packed Commands, Context IDs	√
Power OFF Notification	√
Data Tag	√
Device Health Report	√
Field FW Update	√
Production State Awareness	√
