Data Sheet

True RMS Bench Multimeters 2831E and 5491B

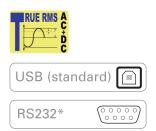

True RMS Bench Multimeters with Dual Display

The B&K Precision models 2831E and 5491B are versatile and dependable bench multimeters suitable for applications in education, service and repair, and manufacturing requiring basic and reliable measurements. Additionally, these instruments enhance your productivity with built-in math functions and USB connectivity, features not found in other bench meters in this price category. Math operations Rel, Max/Min, dBm, dB, %, and Hold provide educators with a convenient tool to teach basic math concepts.

| | Resolution | | | | |
|-------|------------|--------|--|--|--|
| Model | Count | Digits | | | |
| 2831E | 20,000 | 4 1/2 | | | |
| 5491B | 50,000 | 4 3/4 | | | |

The 2831E and 5491B take typical multimeter measurements such as volts, ohms, and amps with great accuracy, stability, and basic VDC accuracy of 0.02% on the 5491B and 0.03% on the 2831E. The meters are also capable of measuring frequency, period, continuity, and performing diode tests. Readings can be taken at a maximum rate of 25 readings/sec with measurement rates selectable between slow, medium, and fast.

Thes multimeters were designed for cost-conscious users requiring a basic and dependable meter with a broad range of features offered at a value price.

Features & benefits

- Up to 50,000 count display resolution
- Basic VDC accuracy of up to 0.02%
- Dual display to indicate two measurements simultaneously
- AC + DC True RMS
- Up to 25 readings per second measurement rate
- AC volt and amp measurement over wide frequency range (ACV 100 kHz/ACI 20 kHz)
- Limit mode for Pass/Fail testing
- Built-in math functions: Rel, Max/Min, dBm, dB, %, Hold, Compare
- CATI (1000 V)/CATII (300 V) Protection
- USB (Virtual Com) and RS232* interface
- SCPI compatible

*5491B only

▲ Versatile tools

Dual Display

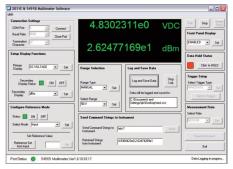

These meters offer a dual display allowing multiple measurements to be conveniently displayed at once. The display values could be two different measurements or one measurement expressed in different units. For example, you can simultaneously read an AC voltage and a frequency value or a DC voltage value expressed in volts and in dB.

Limit Operation

The limit operation lets you set and control the values that determine a HI / IN / LO status of subsequent measurements. The meter can be configured to emit an audible alarm when readings are outside of the configured limit.

Increase Productivity with PC Connectivity

The 2831E and 5491B are programmable via USB and RS232 (5491B only) interface using industry standard SCPI commands. Users can control and configure the instrument from a remote PC and retrieve measurement results for further analysis. The meters can also be remotely controlled using application software (downloadable from the B&K website), which supports front panel emulation and data logging of measurement results.
