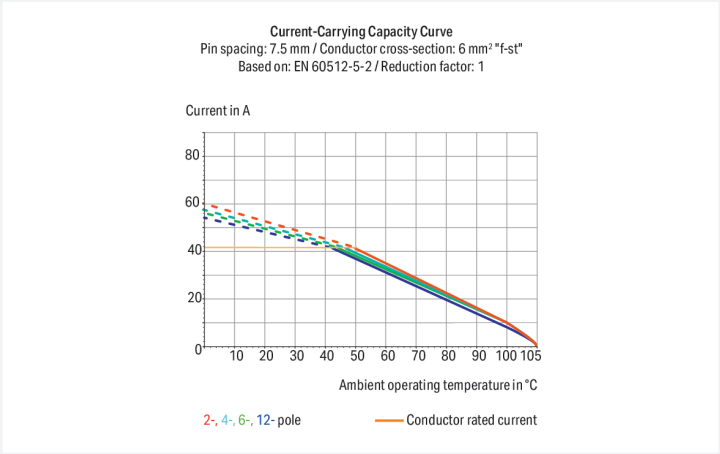
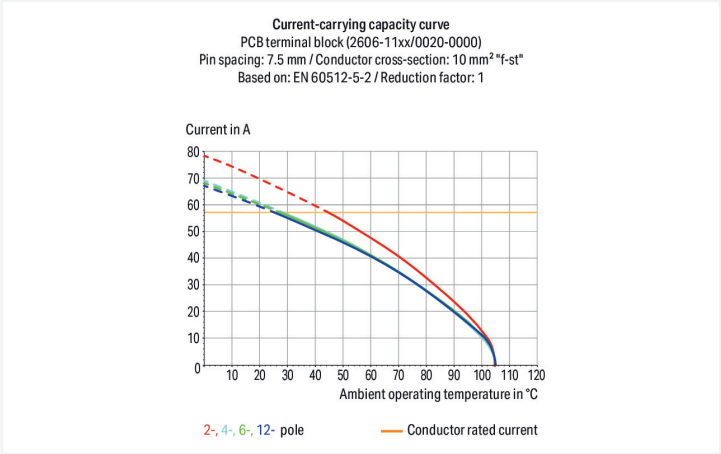
Dimensions in mm





PCB terminal block, 2606 Series, solder pin dimensions 1.5 x 1.2 mm

Quick and easy connections are guaranteed with this PCB terminal block (item number 2606-1105/010-000). It is ideal for custom installations with different mounting types. Rated current and voltage are important parameters when selecting a PCB terminal block, as they indicate possible applications and uses. This product has a rated voltage of 1000 V and a rated current of 41 A, making it suitable for high-load applications. Strip lengths must be between 11 mm and 13 mm when connecting conductors to this PCB terminal block. Featuring one conductor terminal along with Push-in CAGE CLAMP®, this product outperforms the competition. Push-in CAGE CLAMP® technology provides a universal connection solution for any type of conductor. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. The item's dimensions are 40.35 x 28 x 24.3 mm (width x height x depth). This PCB terminal block is suitable for conductor cross sections ranging from 0.2 mm² to 10 mm². It has one level. Five potentials can connect five poles using the five clamping points The gray housing is made of polyamide (PA66) for insulation, the clamping spring is made of chrome-nickel spring steel (CrNi), and the contacts are made of electrolytic copper (ECu). Tin is used for coating the contact surfaces. A lever is used to operate this PCB terminal block. The PCB terminal block is designed for THT soldering. Insert the conductor at an angle of 0°.. The solder pins are organized over the entire terminal strip (staggered). They are 1.5 x 1.2 mm cross-section and 4 mm in length. Each potential has one solder pin.

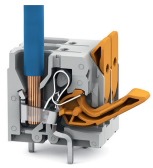
Installation Notes

Conductor termination



Insert fine-stranded conductors – and remove all conductors – via operating tool.

Conductor termination

Insert solid conductors via push-in termination.
