## $120V_{IN}$ , 50 mA, Ultra-Low $I_Q$ , High-PSRR Linear Regulator

#### **Features**

- · AEC-Q100 Qualified
- · Wide Input Voltage Range: 6V to 120V DC
- Ultra-Low Quiescent Current: 6 μA (typ.)
- · 50 mA Ensured Output Current
- Adjustable Output Voltage from 1.27V to 5.5V
- · Withstands Up to +120V DC at the Input
- · Stable with Ceramic Capacitors
- Ultra-High PSRR (80 dB at 10 kHz)
- · Ultra-High Line Transient Rejection (Load Dump)
- · High Output Accuracy
  - ±3% Initial Accuracy
- · Thermal-Shutdown and Current-Limit Protection
- · Thermally Efficient, 8-Lead ePad MSOP Package

#### **Applications**

- Automotive
- · Remote Keyless Entry Power Supply
- · Telecom Applications

### **General Description**

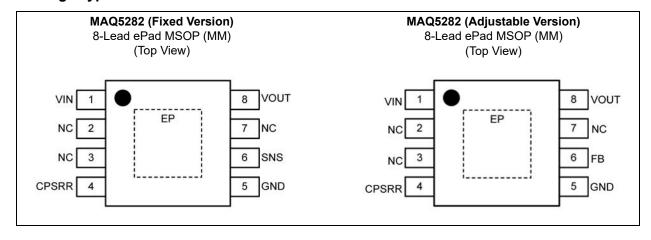

The MAQ5282 high-performance linear regulator offers a very-wide input operating voltage range, up to 120V DC, and supplies an output current of up to 50 mA.

Ideal for high input voltage applications, such as automotive, industrial, and telecom, the MAQ5282 offers  $\pm 3\%$  initial accuracy, extremely high-power supply rejection ratio (80 dB at 10 kHz) and ultra-low quiescent current of 6  $\mu$ A. The MAQ5282 is optimized for high-voltage line transients, making it ideal for harsh environment applications.

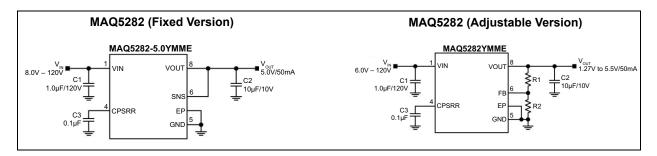

The MAQ5282 is offered in both fixed output voltage (3.3V/5.0V) and adjustable output voltage (1.27V to 5.5V) options.

The MAQ5282 operates over a -40°C to +125°C temperature range and is available in lead-free, RoHS-compliant, 8-lead ePad MSOP package. This part is also AEC-Q100 qualified for automotive applications.

### 1.0 ELECTRICAL CHARACTERISTICS

## **Absolute Maximum Ratings †**

| V <sub>IN</sub> to GND        | 0.3V to +14V<br>0.3V to +6V |
|-------------------------------|-----------------------------|
| ESD Ratings (Note 2)  HBM     | 2 kV                        |
| Operating Ratings ‡           |                             |
| V <sub>IN</sub>               |                             |
| V <sub>OUT</sub> Adjust Range | +1.27V to +5.5V             |

**<sup>†</sup> Notice:** Stresses above those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress rating only and functional operation of the device at those or any other conditions above those indicated in the operational sections of this specification is not intended. Exposure to maximum rating conditions for extended periods may affect device reliability.

- **‡ Notice:** The device is not guaranteed to function outside its operating ratings.
  - **Note 1:** The maximum allowable power dissipation at any  $T_A$  (ambient temperature) is  $P_{D(MAX)} = (T_{J(MAX)} T_A)/\theta_{JA}$ . Exceeding the maximum allowable power dissipation results in excessive die temperature, and causes the regulator to enter thermal shutdown.
    - 2: Devices are ESD sensitive; use proper handling precautions. Human body model, 1.5 k $\Omega$  in series with 100 pF.

#### **ELECTRICAL CHARACTERISTICS**

Electrical Characteristics:  $V_{IN}$  = 12V,  $C_{IN}$  = 1.0  $\mu$ F,  $C_{PSRR}$  = 0.1  $\mu$ F,  $C_{OUT}$  = 10  $\mu$ F,  $I_{OUT}$  = 100  $\mu$ A,  $T_A$  = +25°C, bold values valid for -40°C  $\leq$   $T_J$   $\leq$  +125°C, unless noted. (Note 1)

| Power Supply Rejection Ratio | PSRR                  | _    | 80   | _    | dB    | f = 20 kHz to 1 MHz      |  |  |  |
| Power Dropout Voltage        | Power Dropout Voltage |      |      |      |       |                          |  |  |  |
| Dropout Voltage              | $V_{DO}$              | _    | 2    | 3    | V     | I <sub>OUT</sub> = 50 mA |  |  |  |
| Thermal Protection           |                       |      |      |      |       |                          |  |  |  |
| Thermal Shutdown Temperature | T <sub>SHDN</sub>     | _    | 157  | _    | °C    | T <sub>J</sub> rising    |  |  |  |
| Thermal Shutdown Hysteresis  | T <sub>SD_HYS</sub>   | _    | 15   | _    | °C    | _                        |  |  |  |

- Note 1: Specifications are for packaged products only.
  - 2: Ensure that  $V_{IN} \ge (V_{OUT} + 3V)$  and  $V_{IN} \ge 6V$ .
  - 3: Quiescent current is specified for the adjustable option. The fixed options will add approximately 1 μA due to the internal feedback resistors.
  - **4:** Line regulation is a percentage of V<sub>OUT</sub>.

#### TEMPERATURE SPECIFICATIONS

| Parameters                    | Sym.              | Min. | Тур. | Max. | Units | Conditions     |  |  |
|-------------------------------|-------------------|------|------|------|-------|----------------|--|--|
| Temperature Ranges            |                   |      |      |      |       |                |  |  |
| Junction Temperature Range    | TJ                | -40  | _    | +125 | °C    | Note 1         |  |  |
| Storage Temperature Range     | T <sub>S</sub>    | -65  | _    | +150 | °C    | _              |  |  |
| Lead Temperature              | _                 | _    | _    | +260 | °C    | Soldering, 10s |  |  |
| Package Thermal Resistances   |                   |      |      |      |       |                |  |  |
| Thermal Resistance, MSOP 8-LD | $\theta_{\sf JA}$ |      | 64   | _    | °C/W  | _              |  |  |

Note 1: The maximum allowable power dissipation is a function of ambient temperature, the maximum allowable junction temperature and the thermal resistance from junction to air (i.e., T<sub>A</sub>, T<sub>J</sub>, θ<sub>JA</sub>). Exceeding the maximum allowable power dissipation will cause the device operating junction temperature to exceed the maximum +125°C rating. Sustained junction temperatures above +125°C can impact the device reliability.

### 2.0 TYPICAL PERFORMANCE CURVES

Note:

The graphs and tables provided following this note are a statistical summary based on a limited number of samples and are provided for informational purposes only. The performance characteristics listed herein are not tested or guaranteed. In some graphs or tables, the data presented may be outside the specified operating range (e.g., outside specified power supply range) and therefore outside the warranted range.

| EP                           | EP                            | ePAD     | Exposed Pad for Thermal Relief. Connect EP to GND.                           |

#### 4.0 DETAILED DESCRIPTION

The MAQ5282 voltage regulator accepts a 6V to 120V input and has an ultra-low 6 µA typical quiescent current while offering an excellent line transient response and PSRR. These features make it ideal for harsh, noisy environments. All options of the device offer 50 mA of output current. The MAQ5282YMME offers an adjustable output voltage from 1.27V to 5.5V. The MAQ5282-3.3YMME offers fixed 3.3V outputs and the MAQ5282-5.0YMME offers fixed 5.0V outputs. The YMME packaged devices feature a heat slug to more effectively remove heat from the die.

## 5.0 APPLICATIONS INFORMATION

#### 5.1 Thermal Protection

The MAQ5282 has an internal thermal shutdown circuit to protect it from excessive heating of the die. When the junction temperature exceeds approximately +155°C, the output is disabled and the device begins to cool down. The device turns back on when the junction temperature cools by 15°C. This will result in a cycled output during continuous thermal-overload conditions.

#### 5.2 Current Limit

The MAQ5282 features output current-limit protection. The output sustains a continuous short circuit to GND without damage to the device, but thermal shutdown often results.

### 5.3 Input Capacitor

Connect a 1  $\mu$ F capacitor from VIN to GND. Microchip recommends the C5750X7R2E105M, 1  $\mu$ F, 250V capacitor made by TDK. When using a different capacitor, ensure that the voltage rating of the capacitor exceeds any potential transient.

#### 5.4 CPSRR Capacitor

Connect a 0.1 µF capacitor from CPSRR to GND to maintain high power supply rejection. The voltage rating of the capacitor must be at least 14V.

### 5.5 Output Capacitor

Connect a 10  $\mu$ F capacitor from VOUT to GND. Ensure that the voltage rating of the capacitor exceeds the designed output voltage of the MAQ5282.

#### 5.6 Output Voltage Setting

For the MAQ5282YMME,  $V_{OUT}$  is programmed from 1.27V to 5.5V using:

#### **EQUATION 5-1:**

$$V_{OUT} = V_{REF} \times \left(\frac{R1}{R2} + 1\right)$$

Where:

 $V_{REF} = 1.27V$ 

R1 and R2 are shown in the Typical Application Circuits.

#### 5.7 Thermal Measurements

It is always wise to measure an IC's case temperature to make sure that it is within operating limits, but it is easy to get erroneous results. The standard thermocouple that comes with many voltage meters uses a large wire gauge that behaves like a heat-sink, resulting in artificially low case temperature measurements. Use a thermocouple of 36-gauge wire or smaller, such as the Omega (5SC-TT-K-36-36), to minimize the heat-sinking effect. Also, apply thermal compound to maximize heat transfer between the IC and the thermocouple.

An infrared thermometer is a recommended alternative. The IR thermometer from Optris has a 1 mm spot size, ideal for monitoring small surface mount packages. Also, the optional stand makes it easy to keep the beam on the IC for long periods of time.

## 6.0 EVALUATION BOARD SCHEMATIC

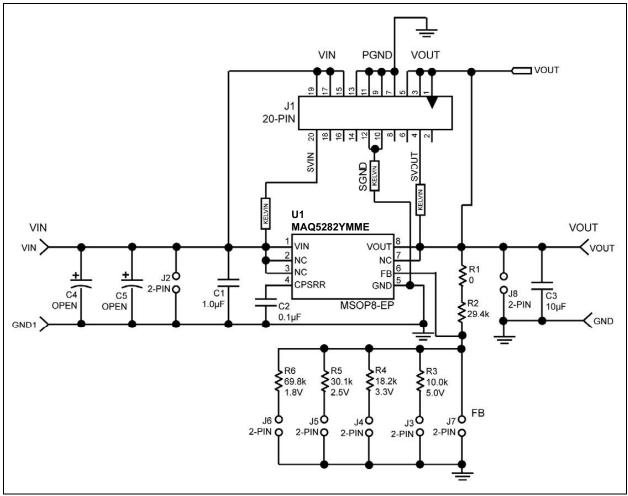

FIGURE 6-1: MAQ5282 Evaluation Board Schematic.

TABLE 6-1: BILL OF MATERIALS

| Item   | Part Number    | Manufacturer | Description  | Qty. |
|--------|----------------|--------------|--|------|
| C1     | C5750X7R2E105M | TDK          | 1.0 μF, 250V, 20%, X7R capacitor (2220)  | 1    |

### 8.0 PACKAGING INFORMATION

## 8.1 Package Marking Information

**Legend:** XX...X Product code or customer-specific information

Y Year code (last digit of calendar year)
YY Year code (last 2 digits of calendar year)
WW Week code (week of January 1 is week '01')

NNN Alphanumeric traceability code

Pb-free JEDEC® designator for Matte Tin (Sn)

\* This package is Pb-free. The Pb-free JEDEC designator (@3)
can be found on the outer packaging for this package.

•, ▲, ▼ Pin one index is identified by a dot, delta up, or delta down (triangle mark).

**Note**: In the event the full Microchip part number cannot be marked on one line, it will be carried over to the next line, thus limiting the number of available characters for customer-specific information. Package may or may not include the corporate logo.

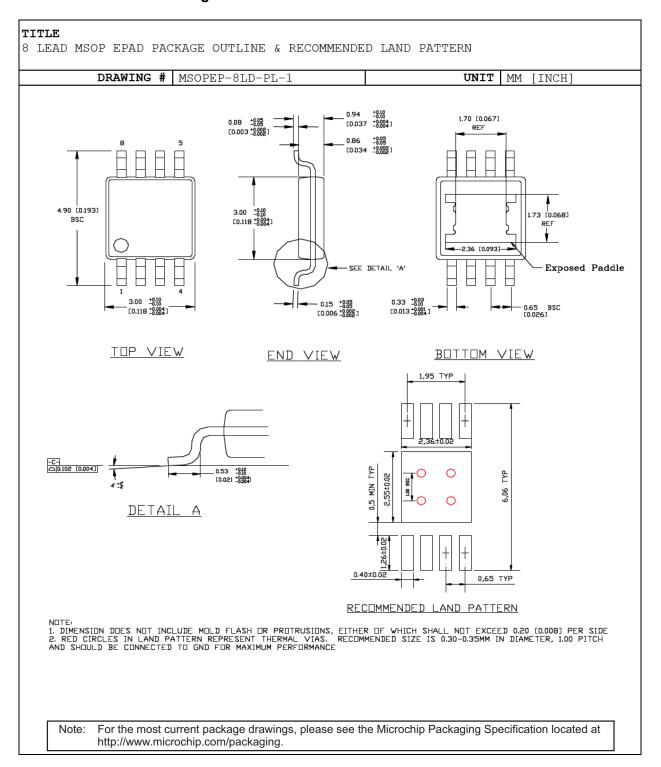

Underbar (\_) symbol may not be to scale.

**Note:** If the full seven-character YYWWNNN code cannot fit on the package, the following truncated codes are used based on the available marking space:

6 Characters = YWWNNN; 5 Characters = WWNNN; 4 Characters = WNNN; 3 Characters = NNN;

2 Characters = NN; 1 Character = N

## 8-Lead MSOP ePAD Package Outline and Recommended Land Pattern

## APPENDIX A: REVISION HISTORY

## Revision A (June 2022)

- Converted Micrel document MAQ5282 to Microchip data sheet DS20006690A.
- Minor text changes throughout.

NOTES:

## PRODUCT IDENTIFICATION SYSTEM

To order or obtain information, e.g., on pricing or delivery, contact your local Microchip representative or sales office.

| Part Num-<br>ber      | - <u>X.X</u>                     | <u>X</u>                      | <u>xx</u>      | - <u>XX</u>                         | <u>vxx</u>           | Example  | es:                                      |  |

NOTES:

#### Note the following details of the code protection feature on Microchip products:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner, within operating specifications, and under normal conditions.
- Microchip values and aggressively protects its intellectual property rights. Attempts to breach the code protection features of Microchip product is strictly prohibited and may violate the Digital Millennium Copyright Act.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not
  mean that we are guaranteeing the product is "unbreakable" Code protection is constantly evolving. Microchip is committed to
  continuously improving the code protection features of our products.

This publication and the information herein may be used only with Microchip products, including to design, test, and integrate Microchip products with your application. Use of this information in any other manner violates these terms. Information regarding device applications is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. Contact your local Microchip sales office for additional support or, obtain additional support at <a href="https://www.microchip.com/en-us/support/design-help/client-support-services">https://www.microchip.com/en-us/support/design-help/client-support-services</a>.

THIS INFORMATION IS PROVIDED BY MICROCHIP "AS IS". MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE, OR WARRANTIES RELATED TO ITS CONDITION, QUALITY, OR PERFORMANCE.

IN NO EVENT WILL MICROCHIP BE LIABLE FOR ANY INDIRECT, SPECIAL, PUNITIVE, INCIDENTAL, OR CONSEQUENTIAL LOSS, DAMAGE, COST, OR EXPENSE OF ANY KIND WHATSOEVER RELATED TO THE INFORMATION OR ITS USE, HOWEVER CAUSED, EVEN IF MICROCHIP HAS BEEN ADVISED OF THE POSSIBILITY OR THE DAMAGES ARE FORESEEABLE. TO THE FULLEST EXTENT ALLOWED BY LAW, MICROCHIP'S TOTAL LIABILITY ON ALL CLAIMS IN ANY WAY RELATED TO THE INFORMATION OR ITS USE WILL NOT EXCEED THE AMOUNT OF FEES, IF ANY, THAT YOU HAVE PAID DIRECTLY TO MICROCHIP FOR THE INFORMATION.

Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

#### **Trademarks**

The Microchip name and logo, the Microchip logo, Adaptec, AVR, AVR logo, AVR Freaks, BesTime, BitCloud, CryptoMemory, CryptoRF, dsPIC, flexPWR, HELDO, IGLOO, JukeBlox, KeeLoq, Kleer, LANCheck, LinkMD, maXStylus, maXTouch, MediaLB, megaAVR, Microsemi, Microsemi logo, MOST, MOST logo, MPLAB, OptoLyzer, PIC, picoPower, PICSTART, PIC32 logo, PolarFire, Prochip Designer, QTouch, SAM-BA, SenGenuity, SpyNIC, SST, SST Logo, SuperFlash, Symmetricom, SyncServer, Tachyon, TimeSource, tinyAVR, UNI/O, Vectron, and XMEGA are registered trademarks of Microchip Technology Incorporated in the U.S.A. and other countries.

AgileSwitch, APT, ClockWorks, The Embedded Control Solutions Company, EtherSynch, Flashtec, Hyper Speed Control, HyperLight Load, Libero, motorBench, mTouch, Powermite 3, Precision Edge, ProASIC, ProASIC Plus, ProASIC Plus logo, Quiet-Wire, SmartFusion, SyncWorld, Temux, TimeCesium, TimeHub, TimePictra, TimeProvider, TrueTime, and ZL are registered trademarks of Microchip Technology Incorporated in the U.S.A.

Adjacent Key Suppression, AKS, Analog-for-the-Digital Age, Any Capacitor, AnyIn, AnyOut, Augmented Switching, BlueSky, BodyCom, Clockstudio, CodeGuard, CryptoAuthentication, CryptoAutomotive, CryptoCompanion, CryptoController, dsPICDEM, dsPICDEM.net, Dynamic Average Matching, DAM, ECAN, Espresso T1S, EtherGREEN, GridTime, IdealBridge, In-Circuit Serial Programming, ICSP, INICnet, Intelligent Paralleling, IntelliMOS, Inter-Chip Connectivity, JitterBlocker, Knob-on-Display, KoD, maxCrypto, maxView, memBrain, Mindi, MiWi, MPASM, MPF, MPLAB Certified logo, MPLIB, MPLINK, MultiTRAK, NetDetach. Omniscient Code Generation, PICDEM, PICDEM.net, PICkit, PICtail, PowerSmart, PureSilicon, QMatrix, REAL ICE, Ripple Blocker, RTAX, RTG4, SAM-ICE, Serial Quad I/O, simpleMAP, SimpliPHY, SmartBuffer, SmartHLS, SMART-I.S., storClad, SQI, SuperSwitcher, SuperSwitcher II, Switchtec, SynchroPHY, Total Endurance, Trusted Time, TSHARC, USBCheck, VariSense, VectorBlox, VeriPHY, ViewSpan, WiperLock, XpressConnect, and ZENA are trademarks of Microchip Technology Incorporated in the U.S.A. and other countries

SQTP is a service mark of Microchip Technology Incorporated in the U.S.A.

The Adaptec logo, Frequency on Demand, Silicon Storage Technology, and Symmcom are registered trademarks of Microchip Technology Inc. in other countries.

GestIC is a registered trademark of Microchip Technology Germany II GmbH & Co. KG, a subsidiary of Microchip Technology Inc., in other countries.

All other trademarks mentioned herein are property of their respective companies.
