# **Vision Advisory**

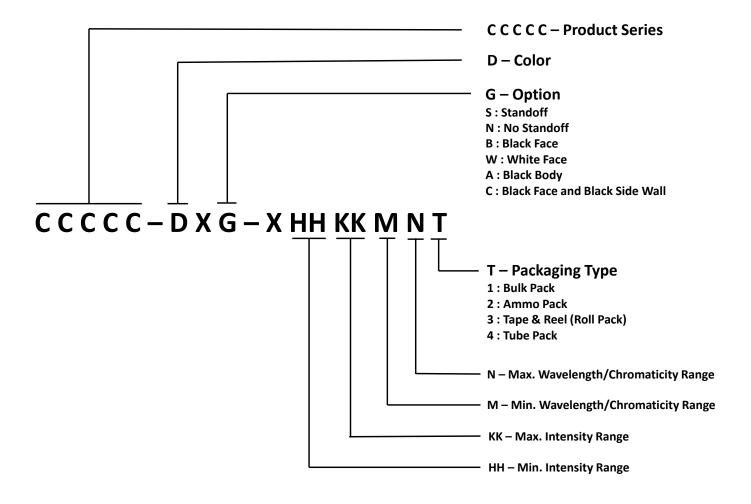

WARNING: Do not look at an exposed lamp in operation. Eye injury can result.

# **KIT NUMBER SYSTEM**

Cree LED lamps are tested and sorted into performance bins. A bin is specified by ranges of color, forward voltage, and brightness. Sorted LEDs are packaged for shipping in various convenient options.

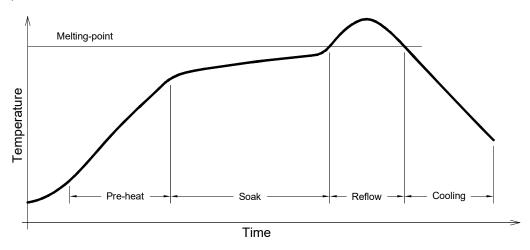

Cree LEDs are sold by order codes in combinations of bins called kits. Order codes are configured in the following manner:

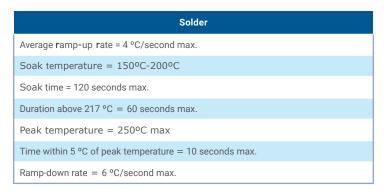

# **REFLOW SOLDERING**

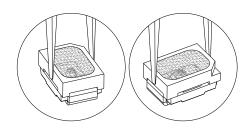

- The CLM2B-REW/AEW is rated as a MSL 5a product.
- · The recommended floor life out of bag is 24hrs.
- · The temperature profile is as below.

# Use only with CLM2B-RTW/ATW

- The packaging sizes of these SMD products are very small and the resin is still soft after solidification. Users are required to handle with care. Never touch the resin surface of SMD products.
- To avoid damaging the product's surface and interior device, it is recommended to choose a special nozzle to pick up the SMD
  products during the process of SMT production. If handling is necessary, take special care when picking up these products. The
  following method is necessary:
- Please refer to the HB LED Lamp Soldering & Handling document for information about how to use this LED product safely.

# **PACKAGING**

- The LEDs are packed in cardboard boxes after packaging in normal or anti-electrostatic bags.
- · Cardboard boxes will be used to protect the LEDs from mechanical shock during transportation.
- The boxes are not water resistant, and they must be kept away from water and moisture.
- · The reel pack is applied in SMD LED.
