INTRODUCTION

This ice tower-style RGB cooling fan is designed for [Raspberry Pi 5](#), consisting of a high tower-type heat-sink with multiple aluminum fins, two metal brackets, an acrylic baseplate, and an adjustable-speed fan.

Its tower design provides maximum surface area, enhancing cooling performance. The included fan is located at the top of the tower, directing air directly onto the heat-sink, helping to accelerate the cooling process by increasing airflow over the fins. The cooling fan can automatically adjust its speed based on the temperature of the Raspberry Pi 5. Additionally, the cooling fan features RGB lights that change colors automatically, creating a dazzling display when the fan operates at high speed!

The Raspberry Pi 5 ice tower-style RGB cooling fan is an effective cooling solution, helping to maintain optimal operating temperatures for the Raspberry Pi 5 and ensuring reliable performance for various applications and use cases.
