Pibow 3 B+ (Raspberry Pi 3 B+, 3, & 2)

Pibow. The most stylish, add-on friendly, and protective case for the Raspberry Pi 3 B+!

We've redesigned Pibow to be compatible with the Raspberry Pi 3 B+, 3, and 2. Due to changes in the layout of the Raspberry Pi 3 B+, older Pibows (ones with a 3/2/B+ label) will not work ideally with Raspberry Pi 3 B+!

Features

- Compatible with Raspberry Pi 3 B+, 3, and 2
- Fully HAT-compatible
- Works great with **standoffs!**
- Protects your beloved Pi!
- Now includes a free extension layer
- Etched port markings and cable escapes

- Clear top and base leave Raspberry Pi visible
- Leaves all ports accessible
- Made from lightweight, high-quality, cast acrylic
- Great for hacking and tinkering!
- Made in Sheffield, UK

Crafted out of ten unique layers, including a transparent top and base, that leave your beautiful Pi visible inside. Each layer is laser-cut from colourful, high-quality, cast acrylic and once stacked they securely contain a Raspberry Pi 3 B+, 3, or 2, while leaving the primary ports, including the camera port, and display port accessible.

Weighing just over 90 grams, the case is lightweight and ideal for mounting to any surface. No tools are required for assembly or disassembly. The dimensions are: 99x66x30mm (WxLxH, not including bolt heads and nuts).

Matt Burke ★★★★★

Great case! Really good design and provides solid protection for your Pi!

Alessandro ... ★★★★★☆

Sturdy and versatile case. I wish there was a top layer for the full height version to accomodate a fan, not just the coupé.

Mic Brown ★★★★★☆

Very nice neat case, perfect fit to the pi 3b. This is not a criticism but I do prefer my old pibow coupe case which is much more compact and keeps everything protected just as well except for the pins on the top. I guess the full size pibow case would be better in a dusty environment. Some very minor issues: the case has a tight opening for the micro usb power connector so I had to swap my cable for one with a smaller head (the old cable fits the pibow coupe easily). Also the bolts that hold the case together are a bit too long. Maybe they are designed to extrude as little legs? Easily fixed with a Stanley knife as they are plastic and now looks tidy. All in all a very nice case, but I'll probably get a pibow coupe instead for my pi 4....
