

POKE HOME: VERTICAL CONTACT THRU-BOARD WIRE INSERTION 12-18 AWG: 9296-11X

General Information

GENERAL DESCRIPTION

KYOCERA AVX continues to develop unique connectors to fill the gap in the market. The newest addition to AVX's broadening line of wire to board poke-home is the 12-18AWG box contact 9296-11X, which is extension of popular vertical poke-home contact 70-9296. This new box contact will allow all 12-18 AWG solid wires and stranded wires. All wire types can be used in both plated and un-plated condition.

This small contact is packed with several key features that provide significant functionality in a broad range of applications. The contact is designed for PCB surface mount and termination is accomplished with 12-18AWG wires pushed directly into the contact.
