Product Description

Specifically designed for quality computer audio applications. This cable extends the connection from the PC sound card, portable CD player or any mini-stereo audio device with 3.5mm jacks to a multimedia speaker. The cable features two 29 AWG stranded conductors and a drain wire, which are tinned to resist oxidation. The conductors and drain wire are wrapped with an aluminum foil shield to resist noise and prevent unwanted EMI/RFI interference. Fully molded nickel-plated connectors provide strain relief, and are color-coded PC-99 to match a computer speaker jack.
