Features and Benefits

• High Output Drive

• Low Input Bias Current

• Low Offset Voltage

• Differential Input Voltage Range

• Logic Outputs Compatible with Bipolar and CMOS

Product Details

The PM111 is a voltage comparator featuring low input bias and offset currents, high-differential voltage ranges, and wide-supply voltage ranges. The inputs and ourputs can be isolated from system... Show More..

Product Lifecycle

✓ Production

At least one model within this product family is in production and available for purchase. The product is appropriate for new designs but newer alternatives may exist.

Design Resources

ADI has always placed the highest emphasis on delivering products that meet the maximum levels of quality and reliability. We achieve this by incorporating quality and reliability checks in every scope of product and process design, and in the manufacturing process as well. "Zero defects" for shipped products is always our goal.
