DESCRIPTION

Why are bananas never lonely? Because they hang around in bunches!

And we have a bunch of these handy **Pomona Minigrabber Test Clip to Stacking Banana Plug** cables! Great for use with your benchtop equipment, these are the highest quality cables and will last you years, if not decades.

This is the 12" long Red version. [Check out different colors and sizes here.](#)

The Minigrabber Clip to Banana Plug is a great way to test and connect without soldering.
