1490-02C	USB to MotherBoard 4-Pin Slot	2 ft	1544 in stock	+ Add to cart
1490-03C	USB to MotherBoard 4-Pin Slot	3 ft	510 in stock	+ Add to cart

The DataPro B cable is a short jumper cable that connects the USB port on the Intel-style motherboard to an external USB connector in a panelmount-style female plug.

This external connector is where the USB bus will connect from the external hub or external devices. It features a panel-mount USB female with 4-40 sized screws.

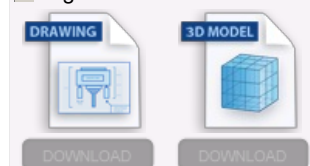

The 1490 has a duplex 4-pin cable. Most motherboards have two sets of 4-pins for two USB ports like the one on this product.

The type-A female connector is held within a durable over-molded plastic casing with embedded 4-40 nuts, ideal for a chassis mount. The required 4-40 mating screws are included with the cable.

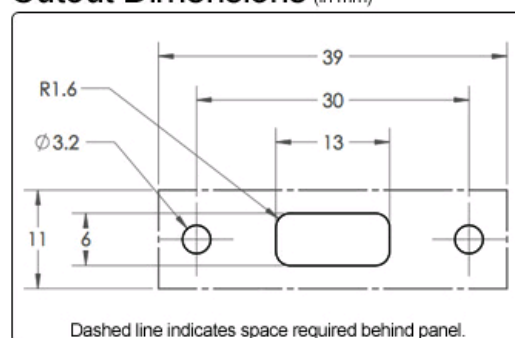

For information about selecting, installing, and using wall plates in your applications, see our [Guide to Wall Plates & Cables](#).
