Product image

Installation terminal blocks have been specially developed for use in sub-distribution cabinets. Due to their design, they still fit under the cover of the respective sub-distribution after wiring. The product range includes both multi-level terminal blocks and single-level N-disconnect terminal blocks with contour-rich feed-through and PE terminal blocks. Depending on the application, a busbar can optionally be integrated in the modular terminal block system.

General ordering data

Version	Neutral conductor modular terminal, Screw connection, 2.5, 400 V, 24 A, TS 35, blue
Order No.	<u>0471780000</u>
Туре	NT 2.5/35 10X3 BL
GTIN (EAN)	4008190112820
Qty.	100 pc(s).
Delivery status	Discontinued
Available until	2023-08-31
Alternative product	1010680000

Marker holder

The marker holder offer the possibility of additional mounting of standard markers with a pitch of 5 or 5.1 mm. The angled holders can be optionally snaped together and could be mounted in all standard marking channels of the Klippon[®] Connect modular terminal blocks. Fitting marker types could be found under the respective accessories of the designation marking holder.

A partition plate is used for the optical separation of circuits or used for electrical isolation from neighbouring cross-connectors. In contrast to the end plate, the contour can be larger than the adjacent terminal blocks. However, it should not be smaller, as otherwise the required clearance and creepage distances within the application can no longer be maintained.
