

USB 3.0 SuperSpeed Active Extension Repeater Cable (A M/F), 5M (16.4 ft.)

MODEL NUMBER: **U330-05M**

Description

Tripp Lite's 16.4-ft. (5 m) USB 3.0 active extension cable is a bus powered extension cable that can be used to increase the length of a device cable without the worry of signal loss and potential performance problems. Increase the extension distance to 32.8-ft. (10 m) by connecting two U330-05M together. USB limits a cable's length to 16-ft. (4.88 m). Any length above 16-ft. (4.88 m) requires the use of an active cable such as this one. This cable has a signal booster built in. The cable must be plugged directly into a USB port (either on the PC or a hub). Use a standard 6-ft. (1.83 m), 10-ft. (3.05 m), or 15-ft. (4.57 m) USB 3.0 A-B cable to reach the desired distance. The U330-05M provides up to 770mA of power to the connected device. If your device requires more than 770mA of power, an external power supply will be required for the connected USB device.
