FAQs

The Camera v2 is the new official camera board released by the Raspberry Pi Foundation. The Raspberry Pi Camera Module v2 is a high quality 8 megapixel Sony IMX219 image sensor custom designed add-on board for Raspberry Pi, featuring a fixed focus lens. It's capable of 3280 x 2464 pixel static images, and also supports 1080p30, 720p60 and 640x480p60/90 video. It attaches to Pi by way of one of the small sockets on the board upper surface and uses the dedicated CSI interface, designed especially for interfacing to cameras.

Features

8 megapixel native resolution sensor-capable of 3280 x 2464 pixel static images
Supports 1080p30, 720p60 and 640x480p90 video
Camera is supported in the latest version of Raspbian, Raspberry Pi's preferred operating system
