

SECURE, SCALABLE WIRELESS SENSORS FOR LONG RANGE IOT APPLICATIONS

Laird Connectivity's Sentrius RS1xx external RTD temperature probe is a **battery-powered, long range** sensor platform that leverages the benefits of LoRaWAN and Bluetooth Low Energy (LE) connectivity.

Packaged in a small, rugged form factor containing **superior RF performance** and connected via a 2-meter control cable to a stainless-steel probe measuring 200 millimeters (4 inches) in length, housing a **PT100 RTD** with a measurement temperature range of -50°C to +450°C (-58°F to +842°F). Towards the high end of the supported range, the external temperature probe is ideally designed for **monitoring temperatures** of commercial kitchen pizza ovens, deep fryers, or even more industrial applications, then transmitting your **data over LoRaWAN**.

At its core, the RS1xx external RTD temperature sensor utilizes Laird Connectivity's field-proven and reliable RS1xx Series hardware, providing **LoRaWAN** options in **868, 915, and 923 MHz** frequencies. The RS1xx works with Laird Connectivity's Sentrius RG1xx Gateway for simple out-of-the-box integration and is compatible with third-party Cloud and LoRa network ecosystem partners.

- **Multi-wireless:** LoRaWAN (868/915/923 MHz) and Bluetooth v4.2 (Central/Peripheral) with fully integrated high-performance antennas
- **External Sensor Probe:** PT100 RTD temperature sensor within SS probe
- **Fully certified** for FCC/IC/CE/ASNZS/NCC/IMDA and Bluetooth SIG
- **Simple wireless configuration** using mobile application over BLE
- **Harsh Environments:** Robust IP65 enclosure to serve many varied installation needs
- **Integrated out of the box networks:** Default configuration with Laird Connectivity's RG1xx gateway for simple, out-of-the-box cloud connectivity
