SKU: 88535
Category: Filament Reels (<http://toner-plastics.com/shop-category/filament-reels/>)

Description

Additional information

PETG is a durable and strong thermoplastic which combines many desirable features from other plastics into one material. PETG offers similar mechanical properties to that of ABS while maintaining the ease of use of PLA. PETG has low thermal shrinkage in comparison to other materials making it a great choice for objects in which high levels dimensional accuracy is required.
