Description

Unibody box for Galileo Gen2 is protective casing for Intel Galileo board. It is durable and simple to assemble which will save you lot thoughts while you trying to keep you applications safe. The interface holes allows for expansion connections. With it, just like an external hard disk driver casing does for us, you will give your favorable portability. In addition, it is designed with minimalism style and look attractive.

Features

Durable PMMA material to ensure you applications always be safe.

Specially designed auto-lock, simple to use.

Lightweight and compact design.

Minimalistic style.

Specification

Material	PMMA
Color	Transparent
Dimensions	136(L) * 80(W) * 20(H) mm
