### ★★★★★ Great Little Synth

about 3 years ago by **Destruction Dynamics** ✓ verified purchaser

This is a fun little guy who has quite the sound. Spent hours with friend trying our best to recreate popular hits.

### ★★★★★ The SparkPunk Sound Kit

about 3 years ago by **Member #651960** ✓ verified purchaser

Sparkfun mails your order post haste! I was so happy b/c my electronics class were making these together and I really messed my first one up, and when I ordered one on my own, these folks made sure it was sent right away, and this is just regular mail, not express, or fast.

Thanks peeps at Sparkfun, I look foreword to checking out other products from you!

Funky Chicken (^\_^)

### ★★★★★ Neat kit for a fair price

about a year ago by **Evan W** ✓ verified purchaser

I just finished putting this together after receiving it a few weeks ago. I knew some soldering basics but hadn't done it in years, never did it well to begin with. I had this kit together in about 2.5 hours and it worked without any trouble shooting. That's either a testament to me or the kit but I'd bet on the latter. I got this as an intro to building my own modular synthesizers. This was a great place to start and I learned quite a bit along the way. I'll be messing with wiring up some of the extra connections and building an enclosure for it in the near future.

### ★★★★☆ Pretty sweet synth

last year by **slowmantofu** ✓ verified purchaser

This was a fun unit to assemble. The price was good, and the result is a very expansive musical instrument with a lot of tonal possibility. I'm glad all the components came in the kit, including a 9V battery, so I didn't have to buy anything else. it was ready to go. My friends loved it. The LED under the trigger button makes it extra cool. Good work! I'm going to get the Step Sequencer next and chain them together.

### ★★★★★ Everyone loves it!

about 9 months ago by **Member #988209** ✓ verified purchaser

When friends are over I plug this in to the stereo and they spend hours playing with it. I posted a vid on instagram and now my brother-in-law wants me to build one for him. The breakout modification options are the most fun for me, though. I've been working on some circuits that will allow me to control it with some of my other DIY synth projects. Endless entertainment!
