

Type 1YN Wi-Fi® + Bluetooth® Module

Infineon CYW43439 Chipset for 802.11b/g/n + Bluetooth 5.2
Datasheet – Rev. E

- Design Name: Type 1YN
- Module P/N: LBEE5KL1YN-814

About This Document

Type 1YN is a small and high performance module based on Infineon CYW43439 combo chipset which supports Wi-Fi 802.11b/g/n + Bluetooth 5.2 BR/EDR/LE. This datasheet describes Type 1YN module in detail.

Please be aware that an important notice concerning availability, standard warranty and use in critical applications of Murata products and disclaimers thereto appears at the end of this specification sheet.

Audience & Purpose

Intended audience includes any customer looking to integrate this module into their product; specifically RF, hardware, software, and systems engineers.

Document Conventions

Table 1 describes the document conventions.

Table 1: Document Conventions

Conventions	Description
	Warning Note Indicates very important note. Users are strongly recommended to review.
	Info Note Intended for informational purposes. Users should review.
	Menu Reference Indicates menu navigation instructions. Example: Insert → Tables → Quick Tables → Save Selection to Gallery 
	External Hyperlink This symbol indicates a hyperlink to an external document or website. Example: Murata  Click on the text to open the external link.
	Internal Hyperlink This symbol indicates a hyperlink within the document. Example: Scope  Click on the text to open the link.
<code>Console input/output or code snippet</code>	Console I/O or Code Snippet This text Style denotes console input/output or a code snippet.
<code># Console I/O comment // Code snippet comment</code>	Console I/O or Code Snippet Comment This text Style denotes a console input/output or code snippet comment. - Console I/O comment (preceded by "#") is for informational purposes only and does not denote actual console input/output. - Code Snippet comment (preceded by "//") may exist in the original code.

1 Scope

This specification characterizes the IEEE 802.11b/g/n + Bluetooth 5.2 BR/EDR/BLE combo module.

2 Key Features

- ◆ Infineon CYW43439 inside
- ◆ Supports IEEE 802.11b/g/n specification: 2.4 GHz.
- ◆ Up to 65 Mbps PHY data rates
- ◆ Supports Bluetooth specification version 5.2.
- ◆ For supported Bluetooth functions, refer to [Bluetooth SIG site](#) 
- ◆ WLAN interface: SDIO 2.0
- ◆ Bluetooth interface: HCI UART and PCM
- ◆ Reference clock is embedded.
- ◆ Temperature Range: - 40 °C to 85 °C
- ◆ Dimensions: 6.95 x 5.15 x 1.1 mm
- ◆ MSL: 3
- ◆ Surface-mount type
- ◆ RoHS compliant.
- ◆ MAC/BD address are embedded.

3 Ordering Information

Table 2 describes the ordering information.

Table 2: Ordering Information

Ordering Part Number	Description
LBEE5KL1YN-814	Module order
LBEE5KL1YN-SMP	Sample module order (If module samples are not available through distribution, contact Murata referencing this part number)
EAR00389	Embedded Artists Type 1YN M.2 EVB (default EVB available through distribution)
LBEE5KL1YN-EVB	Murata Type 1YN EVB (contact Murata as this is special order item)

4 Block Diagram

The Type 1YN block diagram is presented in **Figure 1**.

Figure 1: Block Diagram

5 Certification Information

This section has information about radio and Bluetooth certification.

5.1 Radio Certification

Table 3 shows the radio certification information.

Table 3: Certification Information

Country	ID	Country Code
USA (FCC)	The ID VPYLB1DX of 1DX can be reused.	US
Canada (IC)	The ID 772C-LB1DX of 1DX can be reused.	CA
Europe	EN300328 v2.2.2 conducted test report of Type 1DX can be reused.	DE
Japan	Japanese type certification of Type 1DX can be reused.  01-P00840	JP

Please follow installation manual in [Section 16](#) 

5.2 Bluetooth Qualification

- QDID: 140301
- For supported Bluetooth functions, refer to [Bluetooth SIG site](#) 

Figure 2 shows the dimensions, marking, and terminal configurations.

Figure 1 shows three views of a rectangular object:

- Top View:** A rectangle with length L and width W . It features a circular hole (labeled **C**), a rectangular feature (labeled **A**), a circular feature (labeled **B**), and a rectangular feature (labeled **D**). The object is labeled with the number **012345678** and the text **1YN**.
- Side View:** A rectangle with thickness T .
- Bottom View:** A rectangle with dimensions $c1, c2, c3, c4, c5, c6, c7, c8, c9, c10, c11, c12, c13, c14, c15, c16, c17, c18, c19, c20, c21, c22, c23, c24, c25, c26, c27, c28, c29, c30, c31, c32, c33, c34, c35, c36, c37, c38, c39, c40, c41, c42, c43, c44, c45, c46, c47, c48, c49, c50, c51, c52, c53, c54, c55, c56, c57, c58, c59, c60, c61, c62, c63, c64, c65, c66, c67, c68, c69, c70, c71, c72, c73, c74, c75, c76, c77, c78, c79, c80, c81, c82, c83, c84, c85, c86, c87, c88, c89, c90, c91, c92, c93, c94, c95, c96, c97, c98, c99, c100$. It features a circular hole (labeled **C**), a rectangular feature (labeled **A**), a circular feature (labeled **B**), and a rectangular feature (labeled **D**). The object is labeled with the number **012345678** and the text **1YN**.

Marking	Meaning
A	Inspection Number
B	Murata Logo
C	Pin 1 Marking
D	Module Type

Mark	Dimensions (mm)	Mark	Dimensions (mm)	Mark	Dimensions (mm)
L	6.95 +/- 0.2	W	5.15 +/- 0.2	T	1.1 maximum
a1	0.25 +/- 0.10	a2	0.5 +/- 0.1	a3	0.25 +/- 0.10
b1	0.30 +/- 0.2	b2	0.30 +/- 0.2	c1	0.50 +/- 0.1
c2	0.50 +/- 0.1	c3	0.375 +/- 0.100	e1	0.2 +/- 0.1
e2	0.2 +/- 0.1	e3	0.2 +/- 0.1	e4	0.3 +/- 0.1
e5	1.175 +/- 0.100	e6	1.0 +/- 0.1	e7	0.525 +/- 0.100
e8	0.50 +/- 0.10	m1	1.0 +/- 0.1	m2	1.0 +/- 0.1
m3	0.5 +/- 0.1	m4	0.5 +/- 0.1		

Figure 3 shows the structure of Type 1YN module.

Figure 3: Structure

7 Module Pin Descriptions

This section has the pin descriptions of Type 1YN and pin assignments layout descriptions.

7.1 Module Pin Layout

The pin assignment (top view) layout is shown in **Figure 4**.

Figure 4: Pin Assignments Top View

Table 6 illustrates the terminal configurations.

Table 6: Terminal Configurations

No.	Terminal Name	No.	Terminal Name	No.	Terminal Name
1	GND	15	NC	29	GND
2	BT_UART_RXD	16	NC	30	VBAT
3	BT_UART_TXD	17	WL_GPIO_2	31	VIN_LDO
4	BT_UART_CTS_N	18	WL_GPIO_1	32	GND (SR_PVSS)
5	BT_UART_RTS_N	19	GND	33	GND (SR_PVSS)
6	NC	20	SDIO_CLK	34	SR_VLX
7	NC	21	GND	35	GND
8	BT_PCM_SYNC	22	SDIO_CMD	36	VIO
9	BT_PCM_IN	23	SDIO_DATA_2	37	LPO_IN (32kHz)
10	BT_PCM_OUT	24	SDIO_DATA_0	38	BT_HOST_WAKE
11	BT_PCM_CLK	25	SDIO_DATA_3	39	BT_DEV_WAKE
12	GND	26	SDIO_DATA_1	40	GND
13	NC	27	WL_GPIO_0_HOST_WAKE	41	ANT
14	BT_REG_ON	28	WL_REG_ON	42~46	GND

7.2 Pin Descriptions

Table 7 describes Type 1YN Pins.

Table 7: Pin Descriptions

No.	Pin name	Type	Connection to IC Pin Name	Description
1	GND			Ground
2	BT_UART_RXD	I	BT_UART_RXD	UART serial input. Serial data input for the HCI UART interface.
3	BT_UART_TXD	O	BT_UART_TXD	UART serial output. Serial data output for the HCI UART interface.
4	BT_UART_CTS_N	I	BT_UART_CTS_N	UART clear-to-send. Active-low clear-to-send signal for the HCI UART interface.
5	BT_UART_RTS_N	O	BT_UART_RTS_N	UART request-to-send. Active-low request-to-send signal for the HCI UART interface.
6	NC			
7	NC			
8	BT_PCM_SYNC	I/O	BT_PCM_SYNC	PCM sync; can be master (output) or slave (input)
9	BT_PCM_IN	I	BT_PCM_IN	PCM data input sensing
10	BT_PCM_OUT	O	BT_PCM_OUT	PCM data output
11	BT_PCM_CLK	I/O	BT_PCM_CLK	PCM clock; can be master (output) or slave (input)
12	GND			
13	NC			

No.	Pin name	Type	Connection to IC Pin Name	Description
14	BT_REG_ON	I	BT_REG_ON	Used by PMU to power up or power down the internal regulators used by the Bluetooth section. Also, when de-asserted, this pin holds the Bluetooth section in reset. This pin has an internal 200kΩ pull-down resistor that is enabled by default. It can be disabled through programming.
15	NC			
16	NC			
17	WL_GPIO_2		GPIO_2	
18	WL_GPIO_1		GPIO_1	
19	GND			
20	SDIO_CLK	I		SDIO clock input.
21	GND			
22	SDIO_CMD	I/O	SDIO_CMD	SDIO command line
23	SDIO_DATA_2	I/O	SDIO_DATA_2	SDIO data line 2
24	SDIO_DATA_0	I/O	SDIO_DATA_0	SDIO data line 0
25	SDIO_DATA_3	I/O	SDIO_DATA_3	SDIO data line 3
26	SDIO_DATA_1	I/O	SDIO_DATA_1	SDIO data line 1
27	WL_GPIO_0_HOST_WAKE		GPIO_0	
28	WL_REG_ON	I	WL_REG_ON	Used by PMU to power up or power down the internal regulators used by the WLAN section. Also, when de-asserted, this pin holds the WLAN section in reset. This pin has an internal 200kΩ pull-down resistor that is enabled by default. It can be disabled through programming.
29	GND			
30	VBAT		LDO_VDDBAT5V, SR_VDDBAT5V	
31	VIN_LDO		LDO_VDD1P5, WLRF_VDD_1P35	
32	GND (SR_PVSS)			
33	GND (SR_PVSS)			
34	SR_VLX		SR_VLX	CBUCK switching regulator output.
35	GND			
36	VIO		SCC_VDDIO, SYS_VDDIO	
37	LPO_IN (32 kHz)	I	LPO_IN	External sleep clock input (32.768kHz).
38	BT_HOST_WAKE	I/O	BT_HOST_WAKE	HOST_WAKE or general-purpose I/O signal
39	BT_DEV_WAKE	I/O	BT_DEV_WAKE	DEV_WAKE or general-purpose I/O signal
40	GND			
41	ANT			
42 ~ 46	GND			

7.3 SDIO Pin Descriptions

This section describes the SDIO pins and UART connections. **Table 8** shows the SDIO pin descriptions.

Table 8: SDIO Pin Descriptions

No.	Pin Name	(i) SD 4-bit Mode		(ii) SD 1-bit Mode	
20	SDIO_CLK	CLK	Clock	CLK	Clock
24	SDIO_D0	DATA0	Data line 0	DATA	Data line
26	SDIO_D1	DATA1	Data line 1 /Interrupt	IRQ	Interrupt
23	SDIO_D2	DATA2	Data line 2	NC	Not used
25	SDIO_D3	DATA3	Data line 3	NC	Not used
22	SDIO_CMD	CMD	Command line	CMD	Command line

Figure 5 shows the SDIO pins.

Figure 5: SDIO Pins

10 to 100 kΩ pull-ups are required on the four DATA lines and the CMD line. This requirement must be met during all operating states by using external pull-up resistors or properly programming internal SDIO host pull-ups.

Figure 6 shows the UART connections.

Figure 6: UART Connection

8 Absolute Maximum Ratings

The absolute and maximum ratings are shown in **Table 9**.

Table 9: Absolute Maximum Ratings

Parameter		Minimum	Maximum	Unit
Storage Temperature		-40	+85	°C
Supply Voltage	VBAT	-0.5	5.0	V
	VDDIO	-0.5	3.9	V

Stresses in excess of the absolute ratings may cause permanent damage. Functional operation is not implied under these conditions. Exposure to absolute ratings for extended periods of time may adversely affect reliability. No damage assuming only one parameter is set at limit at a time with all other parameters are set within operating condition.

9 Operating Conditions

The operating conditions are shown in **Table 10**.

Table 10: Operating Conditions

Parameter		Minimum	Typical	Maximum	Unit
Operating Temperature Range		-40	+25	+85	°C
Specification Temperature Range		-10	+25	+55	°C
Operating Voltage	VBAT	3.0	3.6	4.8	V
	VDDIO	1.71	1.8 or 3.3	3.63	V
Specification Voltage	VBAT	3.2	3.6	4.2	V
	VDDIO	1.71	1.8 or 3.3	3.63	V

All RF characteristics in this datasheet are defined by Specification Temperature Range and Specification Voltage.

10 Power-On Sequences

This section describes the power-on sequences along with their parameters.

- VBAT should not rise 10%-90% faster than 40 microseconds.
- VBAT should be up before or at the same time as VIO. VIO should NOT be present fast or be held high before VBAT is high.

Figure 7 shows the power-on sequence graphs for WLAN ON and BT ON.

Figure 7: Power-On Sequence Graph - WLAN ON and BT ON

Figure 8 shows the power-on sequence graph for WLAN ON and BT OFF.

Figure 8: Power-On Sequence Graph - WLAN ON and BT OFF

Figure 9 shows the power-on sequence graph for WLAN OFF and BT ON.

Figure 9: Power-On Sequence Graph - WLAN OFF and BT ON

Figure 10 shows the power-on sequence graph for WLAN OFF and BT OFF.

Figure 10: Power-On Sequence Graph - WLAN OFF and BT OFF

Figure 11 shows the WLAN boot up sequence.

Figure 11: WLAN Boot Up Sequence

※1 This wait time is programmable in sleep-clock increments from 1 to 255 (30 μs to 15 ms).

Figure 12 shows the startup signaling sequence.

Figure 12: Startup Signaling Sequence

- T1 is the time for host to settle its IOs after a reset.
- T2 is the time for host to drive BT_REG_ON high after the Host IOs are configured.
- T3 is the time for BTH (Bluetooth) device to settle its IOs after a reset and reference clock settling time has elapsed.
- T4 is the time for BTH device to drive BT_UART_RTS_N low after the host drives BT_UART_CTS_N low. This assumes the BTH device has already completed initialization.

Timing diagram assumes VBAT is present.

11 Digital I/O Requirements

Table 11 shows the digital I/O requirements for Type 1YN module.

Table 11: Digital I/O Requirement Pins

SDIO Interface I/O Pins	Symbol	Minimum	Maximum	Unit
Input low voltage (VDDIO = 3.3V)	V _{IL}		0.25*VDDIO	V
Input high voltage (VDDIO = 3.3V)	V _{IH}	0.625*VDDIO		V
Input low voltage (VDDIO = 1.8V)	V _{IL}		0.58	V
Input high voltage (VDDIO = 1.8V)	V _{IH}	1.27		V
Output low voltage (VDDIO = 3.3V)	V _{OL}		0.125*VDDIO	V
Output high voltage (VDDIO = 3.3V)	V _{OH}	0.75*VDDIO		V
Output low voltage (VDDIO = 1.8V)	V _{OL}		0.45	V
Output high voltage (VDDIO = 1.8V)	V _{OH}	1.40		V

Table 12 shows the other digital I/O pins.

Table 12: Other Digital I/O Pins

Other Digital I/O Pins	Symbol	Minimum	Maximum	Unit
Input low voltage (VDDIO = 3.3V)	V _{IL}		0.8	V
Input high voltage (VDDIO = 3.3V)	V _{IH}	2.0		V
Input low voltage (VDDIO = 1.8V)	V _{IL}		0.35*VDDIO	V
Input high voltage (VDDIO = 1.8V)	V _{IH}	0.65*VDDIO		V
Output low voltage (VDDIO = 3.3V)	V _{OL}		0.40	V
Output high voltage (VDDIO = 3.3V)	V _{OH}	VDDIO-0.4		V
Output low voltage (VDDIO = 1.8V)	V _{OL}		0.45	V
Output high voltage (VDDIO = 1.8V)	V _{OH}	VDDIO-0.45		V

12 External Sleep Clock Requirement

Table 13 shows the external LPO specification for Type 1YN module.

Table 13: External LPO Specification

Parameter	Condition/Notes	Specification			
		Minimum	Typical	Maximum	Units
Frequency			32.768		KHz
Frequency accuracy		-200		+200	ppm
Duty Cycle		30		70	%
Input amplitude		200		3300	mV, p-p
Signal type	Square wave or sine wave				
Input impedance ¹	Resistive	100			kΩ
	Capacitive			5	pF
Clock jitter				10,000	ppm

¹ When power is applied or switched off.

13 Interface Timing

This section describes the interface timing, its speed modes, related parameters, and graphs.

13.1 SDIO Timing

This section describes the SDIO timings for different modes.

13.1.1 Default Mode

The default mode is shown in **Figure 13**.

Figure 13: SDIO Timing Diagram - Default Mode

Table 14 shows the SDIO timing parameters in default mode.

Table 14: SDIO Timing Parameters - Default Mode

Parameter	Symbol	Minimum	Typical	Maximum	Unit
Clock CLK (All values are referred to minimum VIH and maximum VIL)					
Frequency-Data Transfer Mode	f_{PP}	0		25	MHz
Frequency-Identification Mode	f_{OD}	0		400	kHz
Clock Low Time	t_{WL}	10			ns
Clock High Time	t_{WH}	10			ns
Clock Rise Time	t_{TLH}			10	ns
Clock Fall Time	t_{THL}			10	ns
Inputs: CMD, DAT (referenced to CLK)					
Input Setup Time	t_{ISU}	5			ns
Input Hold Time	t_{IH}	5			ns
Outputs: CMD, DAT (referenced to CLK)					

Parameter	Symbol	Minimum	Typical	Maximum	Unit
Output Delay Time-Data Transfer Mode	t_{ODLY}	0		14	ns
Output Delay Time-Identification Mode	t_{ODLY}	0		50	ns

Timing is based on $CL < 40$ pF load on CMD and Data.
 Minimum (V_{ih}) = $0.7 \cdot V_{DDIO}$ and maximum (V_{il}) = $0.2 \cdot V_{DDIO}$

13.1.2 High Speed Mode

Figure 14 shows the SDIO timing diagram in high-speed mode.

Figure 14: SDIO Timing Diagram - High Speed Mode

Table 15 shows the SDIO timing parameters in high-speed mode.

Table 15: SDIO Timing Parameters - High Speed Mode

Parameter	Symbol	Minimum	Typical	Maximum	Unit
Clock CLK (All values are referred to minimum V_{IH} and maximum V_{IL})					
Frequency-Data Transfer Mode	f_{PP}	0		50	MHz
Frequency-Identification Mode	f_{OD}	0		400	kHz
Clock Low Time	t_{WL}	7			ns
Clock High Time	t_{WH}	7			ns
Clock Rise Time	t_{TLH}			3	ns
Clock Fall Time	t_{THL}			3	ns
Inputs: CMD, DAT (referenced to CLK)					
Input Setup Time	t_{ISU}	6			ns
Input Hold Time	t_{IH}	2			ns

Parameter	Symbol	Minimum	Typical	Maximum	Unit
Outputs: CMD, DAT (referenced to CLK)					
Output Delay Time-Data Transfer Mode	t_{ODLY}			14	ns
Output Hold time	t_{OH}	2.5			ns
Total System Capacitance (each line)	CL			40	pF

Timing is based on CL < 40 pF load on CMD and Data.
 Minimum (V_{ih}) = 0.7*VDDIO and maximum (V_{il}) = 0.2*VDDIO

13.2 Bluetooth UART Timing - Default Mode

Bluetooth UART timing diagram in default mode is shown in **Figure 15**.

Figure 15: Bluetooth UART Timing Diagram - Default Mode

Bluetooth UART timing parameters in default mode are shown in **Table 16**.

Table 16: Bluetooth UART Timing Parameters - Default Mode

Reference	Description	Minimum	Typical	Maximum	Unit
1	Delay time, UART_CTS_N low to UART_TXD valid			1.5	Bit periods
2	Setup time, UART_CTS_N high before midpoint of stop bit			0.5	Bit periods
3	Delay time, midpoint of stop bit to UART_RTS_N high			0.5	Bit periods

13.3 Bluetooth PCM Timing

This section describes the Bluetooth PCM timing sync signals along with their parameters for both long frame and short frame, as well as master and slave modes.

13.3.1 PCM Timing Short Frame Sync - Master Mode

Figure 16 shows the PCM short frame sync signal in master mode.

Figure 16: PCM Timing Short Frame Sync Signal - Master Mode

Table 17 lists information about PCM short frame sync in master mode.

Table 17: Symbol Definitions for PCM Timing Short Frame Sync Signal - Master Mode

Reference	Description	Minimum	Typical	Maximum	Unit
1	PCM bit clock frequency			12	MHz
2	PCM bit clock Low	41			ns
3	PCM bit clock High	41			ns
4	PCM_SYNC delay	0		25	ns
5	PCM_OUT delay	0		25	ns
6	PCM_IN setup	8			ns
7	PCM_IN hold	8			ns
8	Delay from rising edge of PCM_CLK during last bit period to PCM_OUT becoming high impedance	0		25	ns

13.3.2 PCM Timing Short Frame Sync - Slave Mode

Figure 17 shows the PCM short frame sync signal in slave mode.

Figure 17: PCM Timing Short Frame Sync Signal - Slave Mode

Table 18 lists information about PCM short frame sync in slave mode.

Table 18: Symbol Definitions for PCM Timing Short Frame Sync Signal - Slave Mode

Reference	Description	Minimum	Typical	Maximum	Unit
1	PCM bit clock frequency			12	MHz
2	PCM bit clock Low	41			ns
3	PCM bit clock High	41			ns
4	PCM_SYNC setup	8			ns
5	PCM_SYNC hold	8			ns
6	PCM_OUT delay	0		25	ns
7	PCM_IN setup	8			ns
8	PCM_IN hold	8			ns
9	Delay from rising edge of PCM_CLK during last bit period to PCM_OUT becoming high impedance	0		25	ns

13.3.3 PCM Timing Long Frame Sync - Master Mode

Figure 18 shows the PCM long frame sync signal in master mode.

Figure 18: PCM Timing Long Frame Sync Signal - Master Mode

Table 19 lists information about PCM long frame sync in master mode.

Table 19: Symbol Definitions for PCM Timing Long Frame Sync Signal - Master Mode

Reference	Description	Minimum	Typical	Maximum	Unit
1	PCM bit clock frequency			12	MHz
2	PCM bit clock low	41			ns
3	PCM bit clock high	41			ns
4	PCM_SYNC delay	0		25	ns
5	PCM_OUT delay	0		25	ns
6	PCM_IN setup	8			ns
7	PCM_IN hold	8			ns
8	Delay from rising edge of PCM_CLK during last bit period to PCM_OUT becoming high impedance	0		25	ns

13.3.4 PCM Timing Long Frame Sync - Slave Mode

Figure 19 shows PCM long frame sync signal in slave mode.

Figure 19: PCM Timing Long Frame Sync Signal - Slave Mode

Table 20 lists information about PCM short frame sync in slave mode.

Table 20: Symbol Definitions for PCM Timing Long Frame Sync Signal - Slave Mode

Reference	Description	Minimum	Typical	Maximum	Unit
1	PCM bit clock frequency			12	MHz
2	PCM bit clock low	41			ns
3	PCM bit clock high	41			ns
4	PCM_SYNC setup	8			ns
5	PCM_SYNC hold	8			ns
6	PCM_OUT delay	0		25	ns
7	PCM_IN setup	8			ns
8	PCM_IN hold	8			ns
9	Delay from rising edge of PCM_CLK during last bit period to PCM_OUT becoming high impedance	0		25	ns

14 DC/RF Characteristics

This section defines the DC/RF characteristics for Type 1YN.

14.1 DC/RF Characteristics for IEEE 802.11b

Table 21: Characteristics Values for IEEE 802.11b

Items	Contents
Specification	IEEE 802.11b
Mode	DSSS / CCK
Frequency	2400 - 2483.5 MHz
Data Rate	1, 2, 5.5, 11 Mbps

Conditions: 25 °C, VBAT = 3.6V, VDDIO = 3.3V, Output power setting = 17 dBm, 11 Mbps mode

Table 22: DC/RF Characteristics for IEEE 802.11b

Items	Contents			
DC Characteristics	Minimum	Typical	Maximum	Unit
DC Current				
• Tx mode (1024 byte, 20 μ s interval)		320	370	mA
• Rx mode		47	60	mA
TX Characteristics	Minimum	Typical	Maximum	Unit
Output Power (Tolerance)	15	17	19	dBm
Spectrum Mask				
• 1st side lobes		-43	-30	dBr
• 2nd side lobes		-54	-50	dBr
Power-on and Power-off ramp			2.0	μ s
RF Carrier Suppression	15			dB
Modulation Accuracy (EVM)		15	35	%
Out band Spurious Emissions				
• 30 MHz to 1 GHz (BW = 100 kHz)			-36	dBm
• 1 GHz to 12.75 GHz (BW = 100 kHz)			-30	dBm
• 1.8 GHz to 1.9 GHz (BW = 100 kHz)			-47	dBm
• 5.15 GHz to 5.3 GHz (BW = 100 kHz)			-47	dBm
Rx Characteristics	Minimum	Typical	Maximum	Unit
Minimum Input Level (FER $\leq$ 8%)		-89	-76	dBm
Maximum Input Level (FER $\leq$ 8%)	-10			dBm
Adjacent Channel Rejection (FER $\leq$ 8%)	35			dB

14.2 DC/RF Characteristics for IEEE 802.11g

Table 23: Characteristics Values for IEEE 802.11g

Items	Contents
Specification	IEEE 802.11g
Mode	OFDM
Frequency	2400 - 2483.5 MHz
Data Rate	6, 9, 12, 18, 24, 36, 48, 54 Mbps

Conditions: 25 °C, VBAT = 3.6V, VDDIO = 3.3V, Output power setting = 13 dBm, 54 Mbps mode

Table 24: DC/RF Characteristics for IEEE 802.11g

Items	Contents			
DC Characteristics	Minimum	Typical	Maximum	Unit
DC Current				
• Tx mode (1024 byte, 20 μ s interval)		270	310	mA
• Rx mode		47	60	mA
TX Characteristics	Minimum	Typical	Maximum	Unit
Output Power (Tolerance)	11	13	15	dBm
Spectrum Mask				
• 9 MHz to 11 MHz (0 dB ~ -20 dB)		-33	-20	dBr
• 11 MHz to 20 MHz (-20 dB ~ -28 dB)		-41	-28	dBr
• 20 MHz to 30 MHz (-28 dB ~ -40 dB)		-53	-40	dBr
• 30 MHz to 33 MHz (-40 dB)		-53	-40	dBr
Constellation Error (EVM)		-30	-25	dB
Out band Spurious Emissions				
• 30 MHz to 1 GHz (BW = 100 kHz)			-36	dBm
• 1 GHz to 12.75 GHz (BW = 100 kHz)			-30	dBm
• 1.8 GHz to 1.9 GHz (BW = 100 kHz)			-47	dBm
• 5.15 GHz to 5.3 GHz (BW = 100 kHz)			-47	dBm
Rx Characteristics	Minimum	Typical	Maximum	Unit
Minimum Input Level (PER $\leq$ 10%)		-75	-65	dBm
Maximum Input Level (PER $\leq$ 10%)	-20			dBm
Adjacent Channel Rejection (PER $\leq$ 10%)	-1			dB

14.3 DC/RF Characteristics for IEEE 802.11n

Table 25: Characteristics Values for IEEE 802.11n

Items	Contents
Specification	IEEE 802.11n
Mode	OFDM
Frequency	2400 - 2483.5 MHz
Data Rate	6.5, 13, 19.5, 26, 39, 52, 58.5, 65 Mbps

Conditions: 25 °C, VBAT = 3.6V, VDDIO = 3.3V, Output power setting = 12 dBm, 65 Mbps mode

Table 26: DC/RF Characteristics for IEEE 802.11n

Items	Contents			
DC Characteristics	Minimum	Typical	Maximum	Unit
DC Current				
• Tx mode (1024 byte, 20 μ s interval)		260	300	mA
• Rx mode		47	60	mA
TX Characteristics	Minimum	Typical	Maximum	Unit
Output Power (Tolerance)	10	12	14	dBm
Spectrum Mask				
• 9 MHz to 11 MHz (0 dB ~ -20 dB)		-33	-20	dBr
• 11 MHz to 20 MHz (-20 dB ~ -28 dB)		-41	-28	dBr
• 20 MHz to 30 MHz (-28 dB ~ -45 dB)		-53	-45	dBr
• 30 MHz to 33 MHz (-45 dB)		-53	-45	dBr
Constellation Error (EVM)		-31	-27	dB
Out band Spurious Emissions				
• 30 MHz to 1 GHz			-36	dBm
• 1 GHz to 12.75 GHz			-30	dBm
• 1.8 GHz to 1.9 GHz			-47	dBm
• 5.15 GHz to 5.3 GHz			-47	dBm
Rx Characteristics	Minimum	Typical	Maximum	Unit
Minimum Input Level (PER $\leq$ 10%)		-73	-64	dBm
Maximum Input Level (PER $\leq$ 10%)	-20			dBm
Adjacent Channel Rejection (PER $\leq$ 10%)	-2			dB

14.4 DC/RF Characteristics for Bluetooth

Normal conditions: 25 °C, VBAT = 3.6V, VDDIO = 3.3V

Table 27: DC/RF Characteristics for Bluetooth

Items	Contents			
Bluetooth Specification (power class)	Ver 5.1 (Class 1)			
Channel Frequency (spacing)	2402 to 2480 MHz (1 MHz)			
Current Consumption	Minimum	Typical	Maximum	Unit
• Tx = Rx = DH5 (fully occupied)		28	60	mA
• Tx = Rx = 2DH5 (fully occupied)		25	50	mA
• Tx = Rx = 3DH5 (fully occupied)		25	50	mA
Transmitter	Minimum	Typical	Maximum	Unit
Output Power	6	10	14	dBm
Frequency Range	2400		2483.5	MHz
20 dB Bandwidth			1	MHz
Adjacent Channel Power ²				
• [M-N] = 2			-20	dBm
• [M-N] ≥ 3			-40	dBm
Modulation Characteristics	Minimum	Typical	Maximum	Unit
• Modulation Δf_{1avg}	140		175	kHz
• Modulation Δf_{2max}	115			kHz
• Modulation $\Delta f_{2avg} / \Delta f_{1avg}$	0.8			
Carrier Frequency Drift	Minimum	Typical	Maximum	Unit
• 1slot	-25		+25	kHz
• 3slot / 5slot	-40		+40	kHz
• Maximum drift rate			20	kHz/50μs
EDR Relative Power	-4		+1	dB
EDR Carrier Frequency Stability and Modulation Accuracy				
• ω_i	-75		+75	kHz
• $\omega_i + \omega_o$	-75		+75	kHz
• ω_o	-10		+10	kHz
• RMS DEVM (DQPSK)			20	%
• Peak DEVM (DQPSK)			35	%
• 99% DEVM (DQPSK)			30	%
• RMS DEVM (8DPSK)			13	%
• Peak DEVM (8DPSK)			25	%
• 99% DEVM (8DPSK)			20	%
Out-of-Band Spurious Emissions				
• 30 - 1000 MHz			-36	dBm

² Up to three spurious responses within Bluetooth limits are allowed.

Items	Contents			
• 1000 - 12750 MHz			-30	dBm
• 1800 - 1900 MHz			-47	dBm
• 5150 - 5300 MHz			-47	dBm
Receiver	Minimum	Typical	Maximum	Minimum
Sensitivity (BER ≤ 0.1%)		-91	-80	dBm
C/I Performance (BER ≤ 0.1%) ³				
• co-channel			11	dB
• 1 MHz			0	dB
• 2 MHz			-30	dB
• 3 MHz			-40	dB
• image (+4 MHz)			-9	dB
• image +/- 1 MHz			-20	dB
Maximum Input Level (PER ≤ 0.1%)	-20			dBm
EDR Sensitivity (PER ≤ 0.007%)				
8DPSK		-88	-77	dBm

14.5 DC/RF Characteristics for Bluetooth Low Energy

Conditions: 25 °C, VBAT = 3.6V, VDDIO = 3.3V

Table 28: DC/RF Characteristics for BLE

Items	Contents			
Bluetooth Specification (power class)	Version 5.2 (LE)			
Channel Frequency (spacing)	2402 to 2480 MHz (2 MHz)			
Number of RF Channel	40			
Item / Condition	Minimum	Typical	Maximum	Unit
Center Frequency	2402		2480	MHz
Channel Spacing		2		MHz
Number of RF Channels		40		
Output Power			10	dBm
Modulation Characteristics				
• $\Delta f_{1\text{avg}}$	225		275	kHz
• $\Delta f_{2\text{max}}$ (at 99.9%)	185			kHz
• $\Delta f_{2\text{avg}} / \Delta f_{1\text{avg}}$	0.8			
Carrier frequency offset and drift				
• Frequency offset			150	kHz
• Frequency drift			50	kHz
• Drift rate			20	kHz
Receiver sensitivity (PER < 30.8%)		-95	-70	dBm
Maximum input signal level (PER < 30.8%)	-10			dBm
PER Report Integrity (-30 dBm input)	50		65.4	%

³ Up to five spurious responses within Bluetooth limits are allowed.

15 Land Pattern

The land pattern is shown in **Figure 20**.

Figure 20: Land Pattern (Unit: mm)

16 Radio Regulatory Certification by Country for LBEE5KL1YN

This section includes regulatory certification information / user manual of the following regions:

- Japan
- FCC
- ISSED
- Europe

16.1 Japan

Regarding Japan Radio Certification of 1YN

This module is the product that has been authorized “Japan Radio Certification” (Certification of Construction Type) based on type approval system.

Also, it is recommended to describe the following contents in the end product that is built in this module or the user manual.

This product has built-in specified radio equipment which authorized “Japan Radio Certification” (certification number: 001-P00840) based on type approval system.

16.1.1 Power Levels for Japan

Table 29 shows the per antenna port WLAN power table for Japan.

Table 29: Japan Power Level 2.4GHz WLAN Per Antenna Port

Mode	Data Rate	Maximum Tune Up Tolerance [dBm]
		Ch. 1-13
IEEE 802 11b	All Rates	17
IEEE 802 11g	All Rates	13
IEEE 802 11n (HT20)	All Rates	12

Table 30 shows the per antenna port Bluetooth power table for Japan.

Table 30: Japan Power Level 2.4 GHz BT/BLE Per Antenna Port

Mode	Maximum Tune Up Tolerance (dBm)
BR	8.0
LE	8.0

The Bluetooth power **Table 30** is valid for all regions (Japan, USA, Canada, and Europe).

16.1.2 Antenna List

Only recommend PCB trace antenna. If end customer wants to use other type of antenna, customer need to take care of certification. Recommended antenna for 1DX is shown below.

Antenna type	Monopole (pattern antenna)
Antenna gain	0.6 dBi (peak)

16.2 FCC

FCC ID: 772C-LB1YN

This is for OEM integration only. This device cannot be sold to general public. Therefore, OEM must include the following statements on the product and in the installation manual notice as per the FCC/IC requirement.

16.2.1 Information to Display on Host Device and User Manual

16.2.1.1 Information on Host Device

Please describe the following warning on the final product which contains this module.

- Contains Transmitter Module FCC ID: VPYLB1DX or Contains FCC ID: VPYLB1DX

16.2.1.2 Information in User Manual

Please describe the following warning to the manual.

- **FCC CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

When a product is small to include all the text mentioned above, the text above can be mentioned in its manual.

16.2.2 Equipment Installation for FCC

There are two types of installation for host device.

16.2.2.1 Mobile Equipment

Equipment used at position in which the spaces between human body and antenna exceeded 20cm. When installing it in a mobile equipment. Please describe the following warning to the manual.

- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment should be installed and operated keeping the radiator at least 20cm or more away from person's body.
- RF Exposure requirements are met when installed in mobile equipment.

16.2.2.2 Portable Equipment

Equipment for which the spaces between human body and antenna are used within 20cm. When installing it in a portable equipment. Please describe the following warning to the manual.

- This module cannot be installed in portable equipment without further testing and a change to FCC's grant of authorization.
- Contact Murata regarding portable applications.

16.2.3 OEM Integration

This device is intended only for OEM integrators under the following conditions:

- The antenna must be installed such that 20 cm is maintained between the antenna and users, and
- The transmitter module may not be co-located with any other transmitter or antenna.
- The use of an antenna with gain less than 1.4 dBi.

As long as the above three conditions above are met, further transmitter test will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

In the event that these conditions cannot be met (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid, and the FCC ID cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

16.2.4 End Product Labeling

This transmitter module is authorized only for use in device where the antenna may be installed such that 20 cm may be maintained between the antenna and users. The final end product must be labeled in a visible area with the following: "Contains FCC ID:XXXXXXXXXX". The grantee's FCC ID can be used only when all FCC compliance requirements are met.

16.2.5 Manual Information to the End User

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

16.2.6 Power Levels for FCC and ISCED

Table 31 shows the per antenna port WLAN power table for USA and Canada.

Table 31: FCC/ISED Power Level Per Antenna Port

Mode	Data Rate	Maximum Tune Up Tolerance [dBm]
		Ch. 1-11
IEEE 802 11b	All Rates	17
IEEE 802 11g	All Rates	13
IEEE 802 11n (HT20)	All Rates	12

16.3 ISCED

IC: 772C-LB1DX

This product is for OEM integration only. The device cannot be sold to general public. Therefore, we will ask OEM to include the following statements required by FCC/IC on the product and in the Installation manual Notice.

16.3.1 Information to Display on Host Device

Please describe the following warning on the final product while installing in it:

- Contains IC:772C-LB1DX

English Version

This device complies with Industry Canada's applicable license-exempt RSSs. Operation is subject to the following two conditions:

- This device may not cause interference; and
- This device must accept any interference, including interference that may cause undesired operation of the device.

French Version

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- l'appareil ne doit pas produire de brouillage.
- l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

English Version:

Manual Information to the End User

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

French Version:

Manuel d'information à l'utilisateur final

L'intégrateur OEM doit être conscient de ne pas fournir des informations à l'utilisateur final quant à la façon d'installer ou de supprimer ce module RF dans le manuel de l'utilisateur du produit final qui intègre ce module.
Le manuel de l'utilisateur final doit inclure toutes les informations réglementaires requises et avertissements comme indiqué dans ce manuel.

When a product is small to include all the text mentioned above, the text above can be mentioned in its manual.

16.3.2 Equipment Installation for ISED

There are two types of installation for host device.

16.3.2.1 Mobile Equipment

Equipment used at position in which the spaces between human body and antenna exceeded 20cm. When installing it in a mobile equipment. Please describe the following warning to the manual.

English Version

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated keeping the radiator at least 20cm or more away from person's body.

French Version

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement doit être installé et utilisé en gardant une distance de 20 cm ou plus entre le radiateur et le corps humain.

RF exposure requirements are met when installed in mobile equipment.

16.3.2.2 Portable Equipment

Equipment for which the spaces between human body and antenna are used within 20cm. When installing it in a portable equipment. Please describe the following warning to the manual.

- This module cannot be installed in portable equipment without further testing and a change to FCC's grant of authorization.
- Contact Murata regarding portable applications.

16.3.3 OEM Integration

English Version

This device is intended only for OEM integrators under the following conditions (for module device use):

1. The antenna must be installed such that 20 cm is maintained between the antenna and users, and
2. The transmitter module may not be co-located with any other transmitter or antenna.
3. The use of an antenna with gain less than 1.4 dBi.

French Version

Cet appareil est conçu uniquement pour les intégrateurs OEM dans les conditions suivantes: (Pour utilisation de dispositif module)

1. L'antenne doit être installée de telle sorte qu'une distance de 20 cm est respectée entre l'antenne et les utilisateurs, et
2. Le module émetteur peut ne pas être coïmplanté avec un autre émetteur ou antenne.

As long as the above three conditions above are met, further transmitter test will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

English Version

Important Note:

In the event that these conditions cannot be met (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid, and the FCC ID cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

French Version

Note Importante:

Dans le cas où ces conditions ne peuvent être satisfaites (par exemple pour certaines configurations d'ordinateur portable ou de certaines co-localisation avec un autre émetteur), l'autorisation du Canada n'est plus considéré comme valide et l'ID IC ne peut pas être utilisé sur le produit final. Dans ces circonstances, l'intégrateur OEM sera chargé de réévaluer le produit final (y compris l'émetteur) et l'obtention d'une autorisation distincte au Canada.

16.3.4 End Product Labeling

English Version

End Product Labelling:

This transmitter module is authorized only for use in device where the antenna may be installed such that 20 cm may be maintained between the antenna and users. The final end product must be labeled in a visible area with the following: "Contains IC: ".

French Version

Plaque Signalétique Du Produit Final:

Ce module émetteur est autorisé uniquement pour une utilisation dans un dispositif où l'antenne peut être installée de telle sorte qu'une distance de 20cm peut être maintenue entre l'antenne et les utilisateurs. Le produit final doit être étiqueté dans un endroit visible avec l'inscription suivante: "Contient des IC: ".

16.3.5 Manual Information to the End User

English Version

Manual Information To the End User

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

French Version

Manuel d'information à l'utilisateur final

L'intégrateur OEM doit être conscient de ne pas fournir des informations à l'utilisateur final quant à la façon d'installer ou de supprimer ce module RF dans le manuel de l'utilisateur du produit final qui intègre ce module.

Le manuel de l'utilisateur final doit inclure toutes les informations réglementaires requises et avertissements comme indiqué dans ce manuel.

16.4 Europe

Table 32 shows the per antenna port WLAN power table for Europe.

Table 32: Europe Power Level Per Antenna Port

Mode	Data Rate	Maximum Tune Up Tolerance [dBm]
		Ch. 1-13
IEEE 802 11b	All Rates	17
IEEE 802 11g	All Rates	13
IEEE 802 11n (HT20)	All Rates	12

17 Tape and Reel Packing

This section provides the general specifications for tape and reel packing.

17.1 Dimensions of Tape (Plastic Tape)

The dimension of the tape is as follows:

- The corner and ridge radiuses (R) of inside cavity are 0.3 mm maximum.
- Cumulative tolerance of 10 pitches of the sprocket hole is ± 0.2 mm
- Measuring of cavity positioning is based on cavity center in accordance with JIS/IES standard.

Figure 21 is a graphical representation of the tape dimension (plastic tape).

Figure 21: Dimensions of Tape (Plastic Tape)

17.2 Dimension of Reel

Figure 22 shows the reel dimensions in millimeters.

Figure 22: Dimensions of Reel (Unit: mm)

17.3 Taping Diagrams

Figure 23 shows the tapings diagrams.

Figure 23: Taping Diagrams

Table 33 shows the taping specifications.

Table 33: Taping Specifications

Mark	Description
1	Feeding Hole. As specified in Dimensions of Tape (Plastic tape) ☞.
2	Hole for chip. As specified in Dimensions of Tape (Plastic tape) ☞.
3	Cover tape. 62 μm in thickness.
4	Base tape. As specified in Dimensions of Tape (Plastic tape) ☞.

17.4 Leader and Tail Tape

The leader and tail tape are shown in **Figure 24**.

Figure 24: Leader and Tail Tape

1. The tape for chips is wound clockwise, the feeding holes to the right side as the tape is pulled toward the user.
2. The cover tape and base tape are not adhered at no components area for 250 mm minimum.
3. Tear off strength against pulling of cover tape: 5 N minimum.
4. Packaging unit: 1000 pcs. / Reel
5. Material:
 - Base tape: Plastic
 - Reel: Plastic
 - Cover tape, cavity tape and reel are made the anti-static processing.
6. Peeling off force: 1.1 N maximum in the direction of peeling as shown in **Figure 25**.

Figure 25: Peeling Off Force

17.5 Packaging (Humidity Proof Packing)

Figure 26 shows the humidity proof packaging.

Figure 26: Humidity Proof Packaging

Tape and reel must be sealed with the anti-humidity plastic bag. The bag contains the desiccant and the humidity indicator.

18 Notice

18.1 Storage Conditions

- Please use this product within 6 months after receipt.
- The product must be stored without opening the packing under the ambient temperature from 5 to 35 °C and humidity from 20 ~ 70 %RH (packing materials, in particular, may be deformed at the temperature over 40 °C).
- The product left more than 6 months after receipt, the solderability needs to be confirmed the before it is used.
- The product shall be stored in non-corrosive gas (Cl₂, NH₃, SO₂, NO_x, etc.).
- Any excess mechanical shock including, but not limited to, sticking the packing materials by sharp object, and dropping the product, shall not be applied in order not to damage the packing materials.
- This product is applicable to MSL3 (Based on JEDEC standard J-STD-020)
 - After the packing opened, the product shall be stored at ≤ 30 °C / ≤ 60 %RH and the product shall be used within 168 hours.
 - When the color of the indicator in the packing changed, the product shall be baked before soldering.
- Baking condition: 125 +5/-0 °C, 24 hours, 1 time
- The products shall be baked on the heat-resistant tray because the material (Base Tape, Reel Tape and Cover Tape) is not heat-resistant.

18.2 Handling Conditions

Be careful while handling or transporting products because excessive stress or mechanical shock may break products.

Handle with care if products may have cracks or damages on their terminals, the characteristics of products may change. Do not touch products with bare hands that may result in poor solder ability and destroy by static electrical charge.

18.3 Standard PCB Design (Land Pattern and Dimensions)

All the ground terminals should be connected to the ground patterns. Furthermore, the ground pattern should be provided between IN and OUT terminals. Please refer to the specifications for the standard land dimensions.

The recommended land pattern and dimensions should be as Murata's standard. The characteristics of products may vary depending on the pattern drawing method, grounding method, land dimensions, land forming method of the NC terminals and the PCB material and thickness. Therefore, be sure to verify the characteristics in the actual set. When using non-standard lands, contact Murata beforehand.

18.4 Notice for Chip Placer

When placing products on the PCB, products may be stressed and broken by uneven forces from a worn-out chucking locating claw or a suction nozzle. To prevent products from damages, be sure to follow the specifications for the maintenance of the chip placer being used. For the positioning of products on the PCB, be aware that mechanical chucking may damage products.

18.5 Soldering Conditions

The recommendation conditions of soldering are as in **Figure 27**.

Soldering must be carried out by the above-mentioned conditions to prevent products from damaging. Set up the highest temperature of reflow within 260 °C. Contact Murata before use if concerning other soldering conditions.

Figure 27: Reflow Soldering Standard Conditions (Example)

Please use the reflow within 2 times.

Use rosin type flux or weakly active flux with a chlorine content of 0.2 wt. % or less.

18.6 Cleaning

This product is moisture sensitive therefore, cleaning is not recommended. If any cleaning process is done the customer is responsible for any issues or failures caused by the cleaning process.

18.7 Operational Environment Conditions

Products are designed to work for electronic products under normal environmental conditions (ambient temperature, humidity, and pressure). Therefore, products have no problems to be used under the similar conditions to the above-mentioned. However, if products are used under the following circumstances, it may damage products and leakage of electricity and abnormal temperature may occur.

- In an atmosphere containing corrosive gas (Cl₂, NH₃, SO_x, NO_x etc).
- In an atmosphere containing combustible and volatile gases.
- Dusty place.
- Direct sunlight place.
- Water splashing place.
- Humid place where water condenses.
- Freezing place.

If there are possibilities for products to be used under the preceding clause, consult with Murata before actual use.

Do not apply static electricity or excessive voltage while assembling and measuring, as it might be a cause of degradation or destruction to apply static electricity to products.

18.8 Input Power Capacity

Products shall be used in the input power capacity as specified in this specification.

Inform Murata beforehand, in case that the components are used beyond such input power capacity range.

19 Preconditions to Use Our Products

PLEASE READ THIS NOTICE BEFORE USING OUR PRODUCTS.

Please make sure that your product has been evaluated and confirmed from the aspect of the fitness for the specifications of our product when our product is mounted to your product.

All the items and parameters in this product specification/datasheet/catalog have been prescribed on the premise that our product is used for the purpose, under the condition and in the environment specified in this specification. You are requested not to use our product deviating from the condition and the environment specified in this specification.

Please note that the only warranty that we provide regarding the products is its conformance to the specifications provided herein. Accordingly, we shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this specification.

WE HEREBY DISCLAIM ALL OTHER WARRANTIES REGARDING THE PRODUCTS, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, THAT THEY ARE DEFECT-FREE, OR AGAINST INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.

You agree that you will use any and all software or program code (including but not limited to hcd, firmware, nvram, and blob) we may provide or to be embedded into our product ("Software") provided that you use the Software bundled with our product. YOU AGREE THAT THE SOFTWARE SHALL BE PROVIDED TO YOU "AS IS" BASIS, MURATA MAKES NO REPRESENTATIONS OR WARRANTIES THAT THE SOFTWARE IS ERROR-FREE OR WILL OPERATE WITHOUT INTERRUPTION. AND MORE, MURATA MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED WITH RESPECT TO THE SOFTWARE. MURATA EXPRESSLY DISCLAIM ANY AND ALL WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE NOR THE WARRANTY OF TITLE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.

You shall indemnify and hold harmless us, our affiliates, and our licensor from and against any and all claims, costs, expenses and liabilities (including attorney's fees), which arise in connection with the using the Software.

The product shall not be used in any application listed below which requires especially high reliability for the prevention of such defect as may directly cause damage to the third party's life, body or property. You acknowledge and agree that, if you use our products in such applications, we will not be responsible for any failure to meet such requirements. Furthermore, YOU AGREE TO INDEMNIFY AND DEFEND US AND OUR AFFILIATES AGAINST ALL CLAIMS, DAMAGES, COSTS, AND EXPENSES THAT MAY BE INCURRED, INCLUDING WITHOUT LIMITATION, ATTORNEY FEES AND COSTS, DUE TO THE USE OF OUR PRODUCTS AND THE SOFTWARE IN SUCH APPLICATIONS.

- Aircraft equipment.
- Aerospace equipment.
- Undersea equipment.
- Power plant control equipment.
- Medical equipment.
- Traffic signal equipment.

- Burning / explosion control equipment.
- Disaster prevention / crime prevention equipment.
- Transportation equipment (vehicles, trains, ships, elevator, etc.).
- Application of similar complexity and/ or reliability requirements to the applications listed in the above.

We expressly prohibit you from analyzing, breaking, reverse-engineering, remodeling altering, and reproducing our product. Our product cannot be used for the product which is prohibited from being manufactured, used, and sold by the regulations and laws in the world.

We do not warrant or represent that any license, either express or implied, is granted under any our patent right, copyright, mask work right, or our other intellectual property right relating to any combination, machine, or process in which our products or services are used. Information provided by us regarding third-party products or services does not constitute a license from us to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from us under our patents or other intellectual property.

Please do not use our products, our technical information and other data provided by us for the purpose of developing of mass-destruction weapons and the purpose of military use.

Moreover, you must comply with "foreign exchange and foreign trade law", the "U.S. export administration regulations", etc.

Please note that we may discontinue the manufacture of our products, due to reasons such as end of supply of materials and/or components from our suppliers.

By signing on specification sheet or approval sheet, you acknowledge that you are the legal representative for your company and that you understand and accept the validity of the contents herein. When you are not able to return the signed version of specification sheet or approval sheet within 30 days from receiving date of specification sheet or approval sheet, it shall be deemed to be your consent on the content of specification sheet or approval sheet. Customer acknowledges that engineering samples may deviate from specifications and may contain defects due to their development status. We reject any liability or product warranty for engineering samples. In particular we disclaim liability for damages caused by

- The use of the engineering sample other than for evaluation purposes, particularly the installation or integration in the product to be sold by you,
- Deviation or lapse in function of engineering sample,
- Improper use of engineering samples.

We disclaim any liability for consequential and incidental damages.

If you can't agree with the above contents, please contact sales.

Revision History

Revision Code	Date	Changed Item	Comment
	2020.12.10		First Issue
A	2021.06.01	1. Scope 4. Certification Information 14. Tape and Reel Packing Appendix	Update Update Update Added
B	2022.06.14	1. Scope	Update
C	2022.12.10	1. Scope 3. Ordering Information 13. Reference Circuit Appendix	- Updated information. Created new section 'Key Features'. - Added Embedded Artists' M.2 module information. Renamed section. - Moved section to HW app note. - Moved Appendix information into Section 16. - Added transmit power tables. - Moved antenna sections to HW app note. Updated to new format
D	2023.02.14	2. Key Features	Changes the operating temperature range from -30 ~ 70 °C to -40 ~ 85 °C
E	2023.07.12	5. Certification Information	Added more Certification ID information.
