INDUCTORS

⊗TDK

Inductors for power circuits Wound metal SPM series

SPM5030 type

FEATURES

O Magnetic shield type wound inductor for power circuits using a metallic magnetic material.

O Compared to ferrite wound type inductors, it is possible to achieve large current, low Rdc, and compactness.

O Low inductance variance in high-temperature environments with good DC superimposition characteristics.

O Metallic magnetic material is used, and the structure has an integrated molded coil, so hum noise is lower than with core adhesive coils.

○ Operating temperature range: -40 to +125 °C (including self-temperature rise)

APPLICATION

O Note PCs, HDDs, servers, VRMs, compact power supply modules, other

* Rated current: smaller value of either Isat or Itemp.

Isat: When based on the inductance change rate (20% below the initial value)

Itemp: When based on the temperature increase (temperature increase of 40°C by self heating)

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

⚠ REM	INDERS
The storage period is within 12 months. Be sure to follow the stor less).	
If the storage period elapses, the soldering of the terminal electroc	les may deteriorate.
O Do not use or store in locations where there are conditions such as	s gas corrosion (salt, acid, alkali, etc.).
 Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperatur does not exceed 150°C. 	e difference between the solder temperature and chip temperature
Soldering corrections after mounting should be within the range of If overheated, a short circuit, performance deterioration, or lifespar	-
