

OBD-II to DB9 cable

PID: MIKROE-2838

Tap inside the car diagnostic systems

OBD II to DB9 cable enables you to connect with your car's OBD-II system. You just need to plug OBD II connector on one end to your car and the other end it into some sort of hardware interface which has a DB9 connector, like our OBD II click. The overall length of the cable is five feet (152cm).

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
 ISO 14001: 2015 certification of environmental management system.
 OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).
