RK-13

RELAY INTERFACE MODULE

The RK-13 is a relay-interface module for SE-105 and SE-325 remote indication. It provides separate ground-fault and ground-check indication contacts for the SE-105, and separate ground-fault and resistor-fault indication contacts for the SE-325. An isolated input accepts a reset voltage of 24 to 120 Vac/Vdc. The RK-13 mounts directly on the SE-105/SE-325 lower terminal block, and it is compatible with remote indication and reset assemblies (RK-105, RK-105I, RK-325, and RK-325I) and kits (RK-102 and RK-302).

RK-13 CONNECTION DIAGRAMS

a) RK-13 connection without remote indication or reset.

⁽¹⁾ Use K1 for Ground-Check-Valid indication only. Do not use in a trip circuit.

b) RK-13 connection with remote indication and reset.

Contact Rating:
0.08 A 120 Vac/dc
0.50 A 24 Vdc
