

## RO3156D/D-1/D-2

### 868.95 MHz SAW Resonator

**SM3838-6 Case**  
**3.8 X 3.8**

- **Designed for 868.95 MHz SRD Transmitters**
- **Very Low Series Resistance**
- **Quartz Stability**
- **Complies with Directive 2002/95/EC (RoHS)**

The RO3156D is a true one-port, surface-acoustic-wave (SAW) resonator in a surface-mount ceramic case. It provides reliable, fundamental-mode stabilization of fixed-frequency transmitters operating at 868.95 MHz. This SAW is designed specifically for SRD remote control and security transmitters operating under ETSI EN 300 220 regulations.

#### Absolute Maximum Ratings

Rating	Value	Units
Input Power Level	10	dBm
DC Voltage	12	VDC
Storage Temperature	-40 to +85	°C
Soldering Temperature, 10 seconds / 5 cycles maximum	260	°C

#### Electrical Characteristics

Characteristic	Sym	Notes	Minimum	Typical	Maximum	Units
Frequency, +25 °C	RO3156D RO3156D-1 RO3156D-2	$f_C$	868.750 868.800 868.850		869.150 869.100 869.050	MHz
Tolerance from 916.5 MHz	RO3156D RO3156D-1 RO3156D-2	$\Delta f_C$			$\pm 200$ $\pm 150$ $\pm 100$	kHz
Insertion Loss	IL	2, 5, 6		1.20	2.5	dB
Quality Factor	Unloaded Q 50 $\Omega$ Loaded Q	$Q_U$ $Q_L$		6300 850		
Temperature Stability	Turnover Temperature Turnover Frequency Frequency Temperature Coefficient	$T_O$ $f_O$ FTC	10  6, 7, 8	25 fc 0.032	40	°C MHz ppm/°C <sup>2</sup>
Frequency Aging	Absolute Value during the First Year	fA	1	10		ppm
DC Insulation Resistance between Any Two Terminals		5	1.0			M $\Omega$
RF Equivalent RLC Model	Motional Resistance Motional Inductance Motional Capacitance Transducer Static Capacitance	$R_M$ $L_M$ $C_M$ $C_O$	5, 6, 7, 9 5, 6, 9	15.7 18.1 1.85 2.2		$\Omega$ $\mu$ H fF pF
Test Fixture Shunt Inductance	$L_{TEST}$	2, 7		15.2		nH
Lid Symbolization		RO3156D: 715, RO3156D-1: 924, RO3156D-2: 925 //YWWS				
Standard Reel Quantity	Reel Size 7 Inch Reel Size 13 Inch		10	500 Pieces / Reel 3000 Pieces / Reel		

**CAUTION: Electrostatic Sensitive Device. Observe precautions for handling.**

#### NOTES:

- Frequency aging is the change in  $f_C$  with time and is specified at +65 °C or less. Aging may exceed the specification for prolonged temperatures above +65 °C. Typically, aging is greatest the first year after manufacture, decreasing in subsequent years.
- The center frequency,  $f_C$ , is measured at the minimum insertion loss point,  $IL_{MIN}$ , with the resonator in the 50  $\Omega$  test system (VSWR  $\leq$  1.2:1). The shunt inductance,  $L_{TEST}$ , is tuned for parallel resonance with  $C_O$  at  $f_C$ . Typically,  $f_{OSCILLATOR}$  or  $f_{TRANSMITTER}$  is approximately equal to the resonator  $f_C$ .
- One or more of the following United States patents apply: 4,454,488 and 4,616,197.
- Typically, equipment utilizing this device requires emissions testing and government approval, which is the responsibility of the equipment manufacturer.
- Unless noted otherwise, case temperature  $T_C = +25 \pm 2$  °C.
- The design, manufacturing process, and specifications of this device are subject to change without notice.
- Derived mathematically from one or more of the following directly measured parameters:  $f_C$ , IL, 3 dB bandwidth,  $f_C$  versus  $T_C$ , and  $C_O$ .
- Turnover temperature,  $T_O$ , is the temperature of maximum (or turnover) frequency,  $f_O$ . The nominal frequency at any case temperature,  $T_C$ , may be calculated from:  $f = f_O [1 - FTC (T_O - T_C)^2]$ . Typically  $oscillator T_O$  is approximately equal to the specified resonator  $T_O$ .
- This equivalent RLC model approximates resonator performance near the resonant frequency and is provided for reference only. The capacitance  $C_O$  is the static (nonmotional) capacitance between the two terminals measured at low frequency (10 MHz) with a capacitance meter. The measurement includes parasitic capacitance with "NC" pads unconnected. Case parasitic capacitance is approximately 0.05 pF. Transducer parallel capacitance can be calculated as:  $C_P = C_O - 0.05$  pF.
- Tape and Reel Standard Per ANSI/EIA 481.

## Electrical Connections

The SAW resonator is bidirectional and may be installed with either orientation. The two terminals are interchangeable and unnumbered. The callout NC indicates no internal connection. The NC pads assist with mechanical positioning and stability. External grounding of the NC pads is recommended to help reduce parasitic capacitance in the circuit.

Pin	Connection
1	NC
2	Terminal
3	NC
4	NC
5	NC
6	Terminal
7	NC
8	NC

## Case Dimensions

Dimension	mm			Inches		
	Min	Nom	Max	Min	Nom	Max
A	3.60	3.80	4.00	0.142	0.150	0.157
