Product Overview		Technical Specifications	Ratings & Reviews
Galaxy 5000 Features & Benefits			
Manageability			
Network manageable		Provides remote power management of the UPS over the network.	
Multiple distribution options		Superior design flexibility enables a wide range of customer requirements to be addressed.	
Integrates with StruxureWare Data Center Expert		An IT-ready, scalable access monitoring system that collects, organizes, and distributes critical alerts, surveillance video and key information, providing a unified view of complex physical infrastructure environments from anywhere on the network	
LED status indicators		Quickly understand unit and power status with visual indicators.	
LCD graphics display		Text and mimic diagrams that display modes of operation, system parameters and alarms.	
Serviceability			
7x24 telephone technical support		Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you need is there when you need it.	
Multiple levels of service		With the option of packages or individual service components, our services are structured to allow you to pick and choose what you would like APC to do for you.	
Front-access servicing		Simplifies installation and UPS maintenance while minimizing space requirements.	
Sustainability			
EU CoC for UPS		Ensures that UPSs sold in the EU are highly efficient	
Total Cost of Ownership			
Input power factor correction		Minimizes installation costs by enabling the use of smaller generators and cabling.	
Predictive failure notification		Provides early-warning fault analysis ensuring proactive component replacement.	
Wide input voltage range		Designed for harsh electrical environments to save battery life.	
ECO Mode		Operating mode that by-passes unused electrical components in good power conditions to achieve high operating efficiency without sacrificing protection	
Availability			
Parallel-redundant capable		Power the connected equipment with multiple uninterruptible power supplies to increase system redundancy	
Dual mains input		Increases availability by allowing the UPS to be connected to two separate power sources.	

Downloaded from [Arrow.com](#) the ability to adapt the UPS for optimal performance in specific power environments or generator applications.

Frequency and voltage regulation	Gives higher application availability by correcting poor frequency and voltage conditions without using the battery.
Generator compatible	Ensures clean, uninterrupted power to protected equipment when generator power is used.
Parallel-capacity capable	Increases total power capacity by using multiple uninterruptible power supplies simultaneously.
