## ON Semiconductor®

## To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at <a href="www.onsemi.com">www.onsemi.com</a>. Please email any questions regarding the system integration to <a href="mailto:Fairchild\_questions@onsemi.com">Fairchild\_questions@onsemi.com</a>.

### **FCP165N60E**

# N-Channel SuperFET<sup>®</sup> II Easy-Drive MOSFET 600 V, 23 A, 165 m $\Omega$

#### **Features**

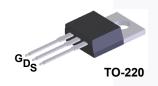

- 650 V @T<sub>J</sub> = 150°C
- Typ.  $R_{DS(on)}$  = 132 m $\Omega$
- Ultra Low Gate Charge (Typ. Q<sub>g</sub> = 57 nC)
- Low Effective Output Capacitance (Typ. C<sub>oss(eff)</sub> = 204 pF)
- · 100% Avalanche Tested
- · RoHS Compliant

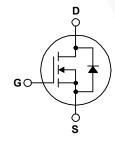

#### **Applications**

- · Telecom / Sever Power Supplies
- · Industrial Power Supplies

#### **Description**

SuperFET® II MOSFET is Fairchild Semiconductor's brand-new high voltage super-junction (SJ) MOSFET family that is utilizing charge balance technology for outstanding low on-resistance and lower gate charge performance. This technology is tailored to minimize conduction loss, provide superior switching performance, dv/dt rate and higher avalanche energy. Consequently, SuperFET II MOSFET easy-drive series offers slightly slower rise and fall times compared to the SuperFET II MOSFET series. Noted by the "E" part number suffix, this family helps manage EMI issues and allows for easier design implementation. For faster switching in applications where switching losses must be at an absolute minimum, please consider the SuperFET II MOSFET series.

#### Absolute Maximum Ratings T<sub>C</sub> = 25°C unless otherwise noted.

Symbol		Parameter		FCP165N60E	Unit	
V <sub>DSS</sub>	Drain to Source Voltage			600	V
