

TAOGLAS®

Datasheet

Part No:
FXUB71.A.54.C.001

Description:

5G/4G 2*MIMO Wideband 600-6000MHz Flex Circuit PCB
with 150mm of 1.37 and I-PEX MHF 4L

Features:

Flexible PCB Antenna for ease of installation
Worldwide 5G functionality with 4G and 3G/2G
Wideband 600-6000MHz Operational
Dimensions: 240mm*21mm*0.15mm
Cable: 150mm 1.37
Connector: I-PEX MHF® 4L (HSC compatible)
3M adhesive tape for "Peel and Stick" Mounting
RoHS & Reach Compliant

1. Introduction

The patent pending FXUB71 antenna is an industry leading embedded 5G/4G 2*2 MIMO flexible polymer monopole type antenna for worldwide 5G/4G applications, which operates across the full 600-6000MHz spectrum. The antenna comes with a micro coax cable and connector, and has good efficiency and isolation between ports, critical for optimal 5G/4G MIMO wireless performance.

Typical applications

- Gateways and Routers
- High speed HD streaming
- Wireless Access Points
- Handheld Devices
- High capacity MIMO networks for Public Transportation

With over 30% efficiency on all bands, isolation performance between the two ports is under -10dB in all bands. The antenna has been designed in a slim rectangular form-factor, with its own automotive quality 3M 467 adhesive backing tape, to ensure good isolation and convenient installation into typical M2M/IOT devices. Simply peel and stick onto your plastic housing.

The antenna is tuned to work on a reference ABS plastic of 2mm of thickness which is a common standard for most device plastics. Cable routing has been carefully planned to ensure no cross-over of cable, and a logical and hassle free installation. Like all such antennas, care should be taken to mount the antenna at least 10mm from metal components or surfaces, and ideally 20mm for best radiation efficiency.

The FXUB71 uses a future proof I-PEX MHF® 4L connector for 5G applications to match the many module providers new 5G modules who utilize this smaller receptacle.

Before integration of the antenna in your device, especially if you require PTCRB or US network approvals, please contact your regional Taoglas customer support team. Cable length and connector type are fully customizable, for further information please contact your regional Taoglas customer support team.

2. Specifications

Electrical

Band	Frequency (MHz)		Efficiency (%)	Average Gain (dB)	Peak Gain (dBi)	Impedance	Max Input Power	Polarization	Radiation Pattern
5GNR/4G Band 71	617~698	MIMO 1	33.7	-4.73	1.08	50 Ω	2W	Linear	Omni-Directional
		MIMO 2	32.7	-4.85	1.18

*Tested on 2mm ABS

Mechanical

Dimensions	240mm X 21mm X 0.15mm
Weight	4.2g
Material	Flexible Polymer
Connector	I-PEX MHF® 4L (HSC Compatible)
Cable	150mm of $\varnothing$ 1.37 Coaxial cable
Adhesive	3M 467

Environmental

Temperature Range	-40°C to 85°C

5. Mechanical Drawing (Units: mm)

ISO NO.: EDW-20-8-0847

STATE: Release

- NOTES:
1. No dregs or insufficient soldering. Solder thickness 0.3 ~1.7mm
 2. The solder must be smooth and full to the edges of the pad.
 3. The solder must not extend outside of the pad area.
 4. The connector position has special orientation to the PCB as per drawing.
 5. All material must be RoHS compliant.
 6. OPEN/SHORT QC, VSWR required.
 7. Soldered area.
