

RAFIX 22 QR, illuminated selector switch, round collar, short lever, frontring metallic silver, 1 x 40°, momentary contact function, illuminable

DISCONTINUED

Description

RAFIX control units are modular units consisting of several parts. In the RAFIX 22 QR family, they always consist of an actuating element, coupling, and switching element, or of a light attachment, coupling, and lamp socket. For assembly, the switching elements and lamp holders are first snapped into the coupling. Then this unit is snapped onto the actuating element or the signal lamp. To release, a bayonet lever must be actuated.

Actuating elements (such as pushbuttons or emergency stop actuators) have the specified tactility and function only when assembled with the appropriate switching elements. For illuminated actuators and illuminated attachments, please use a lamp socket / LED element as the middle element in the coupling.

For RAFIX 22 QR actuating elements, you can choose between two collar shapes: round and square. The mounting diameter is 22.3 mm according to the standard. The anti-rotation lug can be easily removed with a screwdriver if necessary.

Additional information according to UL certificate:

- These devices should be mounted in an overall enclosure with sufficient stability and with the specified clearances.

technical data

➤ general

Front ring color	metallic silver	direct links
Collar shape	round	➤ RAFI eCatalog
Operating temperature, min.	-25 °C	
Operating temperature, max.	70 °C	
Storage temperature, min.	-40 °C	
Storage temperature, max.	80 °C	
illuminated	Yes	
Packaging	Box	
Packaging unit	10 pcs.	
Net weight	21 g	
Operating life	500,000 cycles	
B10	650,000 cycles

Fixing	Threaded ring
Actuation function	momentary contact function
Operating torque, max.	2 Nm
Threaded ring torque, max.	1.2 Nm
Rotating angle	1 x 40°

Use according to UL:

RAFIX control devices are defined at RAFI as modular elements, consisting of an actuating element, if necessary a coupling and an individual contact or lighting unit.

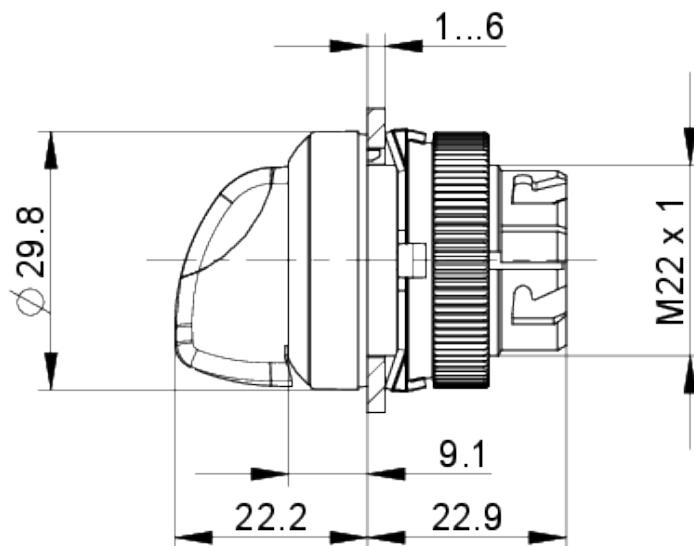

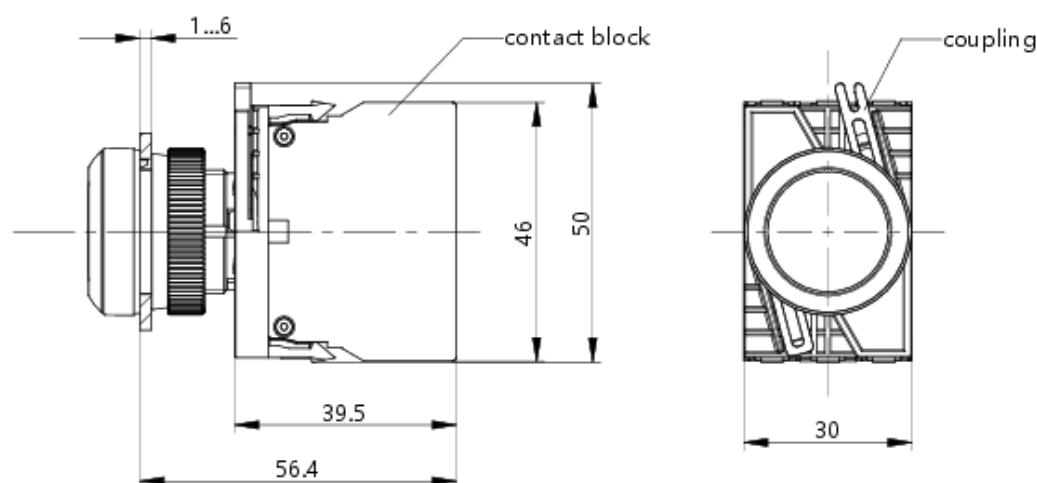

Actuating elements (such as pushbuttons, emergency stop actuators, etc.) have the intended tactility, reset and function only when assembled with the appropriate switching elements.
