| Manageability                              |                                                                                                                                                                                                                                                                       |
| Network interface                          | Provides management by connecting the device directly to the network with a dedicated IP address, avoiding the need for a proxy such as a server. Management is available via Web browser, Telnet or SSH. Notification features inform you of problems as they occur. |
| Availability                               |                                                                                                                                                                                                                                                                       |
| Steam humidifier                           | Humidity is managed through a self-contained steam canister humidifier for maximum efficiency and ease of maintenance. The pure-steam canister maintains consistent capacity output, and requires very little scheduled maintenance.                                  |
| Direct drive motors                        | Stress on bearings is nearly eliminated, increasing useful life. Allows integral fan/motor assembly to be factory balanced, which lowers vibration and expedites startup.                                                                                             |
| Serviceability                             |                                                                                                                                                                                                                                                                       |
| Front service access                       | The system has full service, front access for routine servicing of components. Front access also narrows the footprint of the system making it possible for units to be placed side by side.                                                                          |
| Total Cost of Ownership                    |                                                                                                                                                                                                                                                                       |
| Electric Reheat                            | Prevents overcooling during dehumidification.                                                                                                                                                                                                                         |
| Variable speed fans                        | Variable speed fans reduce energy consumption during off-peak cooling periods.                                                                                                                                                                                        |
