DESCRIPTION | INCLUDES | DOCUMENTS

This is the LilyPad Rainbow LED strip, with seven LilyPad LEDs that are still attached to one another, letting you snap LEDs apart at your leisure to sew into clothing or whatever else you can dream up.

The LilyPad Rainbow LED features seven individual LEDs in six unique colors (Red, Blue, Green, Yellow, Pink, and White). Text has been added to the back of each board to indicate its color. Due to popular request, we have included two white LEDs instead of just one.

Note: A portion of this sale is given back to Dr. Leah Buechley for continued development and education in e-textiles.

Awesome product

about a year ago by Member #832082 verified purchaser

These lights are so easy to work with and the Rainbow LED strip is a great way to get all colors needed for a project. All lights worked and lit up brightly. I would definitely buy them again as well as other LilyPad products.

Great for wearables and small projects

about a year ago by Member #430401 verified purchaser

These things are awesome for discreet lighting effects. They are easy and self explanitory, and are great for sewing into clothes. It did some wearable lighting for my daughter, as well as used some a couple years ago for lights on her dollhouse (which also server as a night light).

Easy and Fun

about 3 months ago by Member #1193510 verified purchaser

Very easy to work with and lights up very colorful and bright. My 10 year old really enjoyed making her dance glove with them.
