Through terminal block, 284 Series, operating tool

Our through terminal block (item number 284-604) makes connecting wires quick and easy. Whether for use in industry or building installations, our rail-mount through terminal blocks allow you to quickly and securely connect electrical conductors. They're perfect for either classic through-wiring or distributing potential, depending on the variant. Rated current and voltage are key factors to consider when choosing a through rail-mount terminal block, as they determine the product's suitability for different applications. This product has a rated voltage of 800 V and a rated current of 57 A. Conductors can only be connected to this through terminal block if their strip length is between 12 mm and 13 mm. This product features conductor terminals and utilizes CAGE CLAMP®. Our highly-rated and maintenance-free CAGE CLAMP® connection makes it easy to connect all types of conductors without having to prepare the conductor. For example, you don't need to crimp ferrules. This through terminal block is suitable for conductor cross sections ranging from 0.2 mm² to 10 mm². It features one level and two clamping points that you can use to connect a single potential. The blue housing is made of polyamide (PA66) for insulation. An operating tool is used to operate this through rail-mount terminal block. These through rail-mount terminal blocks are mounted using DIN-35 rails.. The front-entry wiring makes it possible to connect copper conductors.

Installation Notes

Installation

Snapping a terminal block onto the DIN-rail.

Quick assembly keys prevent reverse mounting.
Removing a terminal block from the assembly.
Steel DIN-rails are not suited for PEN (ground and N-conductor) applications per EN 60947-7-2 (VDE 0611, Part 3).

Conductor termination

CAGE CLAMP® connection
Inserting a conductor.
CAGE CLAMP® connection

With ferruled conductors, it is necessary to use a terminal block one size larger than the conductor's nominal cross-section.
CAGE CLAMP® connection
Removing a solid conductor.

Commoning

Commoning using an adjacent jumper. Push jumper down until fully inserted!
Testing

Testing with a test plug.
Picture shows a test plug adapter (209-170).

Snapping test plug and spacer modules together to assemble a multi-pole test plug module (max. 10 poles) for 10 mm terminal block width.

Test plug modules are directly plugged into the jumper contact slot of the current bar (picture shows 284 Series).
