Description

Features

What's Included

The Analog Discovery Studio provides a whole sweet of test and measurement equipment in one compact device, and has a variety of cables. Whether storing multiple devices in a lab for student checkout, or carrying the Analog Discovery in a backpack the Analog Discovery Studio Case is a great solution for protecting the device.

This case comes ready-to-use with a foam insert shaped to enable easy storage of the Analog Discovery Studio, power supply, and cables. The sturdy plastic case with securing clasps and a handle will keep projects safe while on the go, providing users with the freedom and mobility to set up a lab space wherever they choose.

The sticker on the top of the case has a convenient place to label the case with a name or unit number. This is particularly convenient for storing multiple Analog Discovery Studios in a lab or library, or when creating a device rental or checkout system.
