Model 73000-00R

The Systium Model 730 is a high quality, RoHs compliant 3U Rack.

Featuring a 350W power supply and two 92mm fans ensure reliability and supreme cooling for high demand operations. The 730 is 22" deep, with three 5.25" external drive bays plus up to six internal 3.5" hard drives (2 standard). CSA-UL, FCC-CE Certifications make this your perfect choice. Available with or without certifications.

Datasheet

If your application requires higher wattage Systium has alternative power supply options. Please contact Systium for further details.

NOTE: Standard ATX form factor motherboards will fit in this unit. Ext. ATX/Server form factor motherboards may need an adapter plate. Please contact Systium Technical Support for information.

Certified Motherboards

The following manufacturers' motherboards have been certified in the 73000 -00R. The 73000 -00R should only be ordered by customers intending to integrate motherboards Certified by Systium.

If the motherboard you intend to use is not listed above please contact Systium. We can certify other motherboards in the 73000 -00R for a nominal charge or the 73000 -00 (no regulatory labels) can be used with other motherboards.

- ? Radisys JD/QZ35Q

Packaging

The Model 73000-00R is shipped in a Single Pack Packaging. This packaging has been designed and tested for shipping the fully integrated computer using common carriers (UPS, FedEx, DHL, etc.)

Contact Systium if you have special packaging requirements or if you prefer bulk pack packaging.

Parts & Accessories

Part #	Description
