Raspberry Pi Zero Case
◉ PRT-14273

DESCRIPTION   INCLUDES

The Raspberry Pi Zero Case has been designed to fit both the Pi Zero and the Pi Zero W. These official cases consist of several parts and protect the Raspberry Pi Zero from things like rogue wires that might short it out while still allowing full access to the board. Simply snap the RPi into the bottom half of the enclosure, then snap on a desired top. No tools required!

Each case has a standard base featuring a cut-out to allow access to the GPIO, and a choice of three lids: a standard lid, a GPIO lid (allowing access to the GPIO pins from above) and a camera lid (which, when used with the short camera cable supplied, allows the Raspberry Pi camera to be fitted neatly inside it). Additionally, each case includes a 4cm long CSI cable and four rubber feet.

Note: This case does **NOT** include a Raspberry Pi or Camera Module.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
