HOME / PRODUCT CATEGORIES / FASTENERS / SCREW - PHILLIPS HEAD (1/4", 4-40, 10 PACK)

## Screw - Phillips Head (1/4", 4-40, 10 pack)

PRT-10453 ROHS ✓

**Description:** There are your standard Philips-head 4-40 screws. They are 1/4" long and come in packs of ten. This is the screw size we use in most of the holes for our breakout boards. Check below for other associated hardware.

These screws are a work of art.

Look at the way the threads elegantly curve and spiral from the point to the finely crafted head. The 'x' is sliced into the head of the screw as if it is artistically stamped into a stick of partially melted silver butter.

Beautiful.

IllogicGate / about 5 years ago / ★ 1

Um, I think I see some sarcasm on your keyboard?

Member #529399 / about 2 years ago / ★ 1

Wont fit the SparkFun LCD-09568 20x4 LCD. The LCD PCB board has metal through holes and the screws are one diameter size too large to fit! What a disappointment!!!

COM-08653 SparkFun Keypad - 12 Button has plastic housing with four mounting screw holes. The holes are smaller than this screw set but you can easily screw them through with slight pressure cutting threads into the

button pad housing holes.

 [icyfyer](#) / about 4 years ago / ★ 1

Heads up: these screws do NOT fit into the mounting holes of this LCD without modification to the holes:

<http://www.sparkfun.com/products/709>

It's very close, and maybe with a little persuasion, but if you're planning to use these to hold the LCD in place, and screw these into the standoffs sold below, you'll need that persuasion.

 [RobertC.](#) / about 4 years ago / ★ 1

correct. that's why they aren't related to eachother :-)

but you can fit them in there, but you're effectively threading them into the PCB.

So... what are you supposed to use, then? I'm trying to find the right stand-offs for this CMOS camera: <https://www.sparkfun.com/products/11745>. The holes on the four corners of that camera are something like 2mm in diameter.

 [RobertC.](#) / last year / ★ 1

Unfortunately, we don't have anything. You would need either an M2 screw, or maybe a 2-56. Hit up a home depot or hardware store and look in their actual hardware section under machine screws. You should be able to find something.

 [still\\_learning](#) / about 5 years ago / ★ 1

Any chance you can also sell #4 washers?

 [swort](#) / about 5 years ago / ★ 1

Do these screws fit with makerbeam?
