★★★★★ Works Great!

about 2 years ago by **Member #695307** ✓ verified purchaser

These breakout boards were a great help in making my custom keyboard. I didn't end up using the leds, but I popped a diode on, soldered them together and it's working great so far. They are handy little boards.

★★★★★ Works perfectly

about a year ago by **Member #856617** ✓ verified purchaser

Using them for a project emulating old console buttons on military-style machines. Work beautifully!

★★★★★ Works wonderfully

about 2 weeks ago by **Squirrelius** ✓ verified purchaser

Easy to solder as key-switch snaps into place...no adhesive required. I recommend soldering the headers first though.
