

## 74F543

### Octal Registered Transceiver

#### General Description

The F543 octal transceiver contains two sets of D-type latches for temporary storage of data flowing in either direction. Separate Latch Enable and Output Enable inputs are provided for each register to permit independent control of inputting and outputting in either direction of data flow. The A outputs are guaranteed to sink 24 mA while the B outputs are rated for 64 mA.

#### Features

- 8-bit octal transceiver
- Back-to-back registers for storage
- Separate controls for data flow in each direction
- A outputs sink 24 mA
- B outputs sink 64 mA

#### Ordering Code:

| Order Number | Package Number | Package Description                                                       |
|--------------|----------------|---------------------------------------------------------------------------|
| 74F543SC     | M24B           | 24-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-013, 0.300 Wide |
| 74F543MSA    | MSA24          | 24-Lead Shrink Small Outline Package (SSOP), EIAJ TYPE II, 5.3mm Wide     |
| 74F543PC     | N24A           | 24-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-011, 0.600 Wide     |
| 74F543SPC    | N24C           | 24-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300 Wide     |

Devices also available in Tape and Reel. Specify by appending the suffix letter "X" to the ordering code.

## Functional Description

The F543 contains two sets of eight D-type latches, with separate input and output controls for each set. For data flow from A to B, for example, the A-to-B Enable ( $\overline{CEAB}$ ) input must be LOW in order to enter data from  $A_0$ – $A_7$  or take data from  $B_0$ – $B_7$ , as indicated in the Data I/O Control Table. With  $\overline{CEAB}$  LOW, a LOW signal on the A-to-B Latch Enable ( $\overline{LEAB}$ ) input makes the A-to-B latches transparent; a subsequent LOW-to-HIGH transition of the  $\overline{LEAB}$  signal puts the A latches in the storage mode and their outputs no longer change with the A inputs. With  $\overline{CEAB}$  and  $\overline{OEAB}$  both LOW, the 3-STATE B output buffers are active and reflect the data present at the output of the A latches. Control of data flow from B to A is similar, but using the  $\overline{CEBA}$ ,  $\overline{LEBA}$  and  $\overline{OEBA}$  inputs.

## Data I/O Control Table

| Inputs            |                   |                   | Latch       | Output  |
|-------------------|-------------------|-------------------|-------------|---------|
| $\overline{CEAB}$ | $\overline{LEAB}$ | $\overline{OEAB}$ | Status      | Buffers |
| H                 | X                 | X                 | Latched     | High Z  |
| X                 | H                 | X                 | Latched     | —       |
| L                 | L                 | X                 | Transparent | —       |
| X                 | X                 | H                 | —           | High Z  |
| L                 | X                 | L                 | —           | Driving |

H = HIGH Voltage Level

L = LOW Voltage Level

X = Immaterial

A-to-B data flow shown; B-to-A flow control is the same, except using  $\overline{CEBA}$ ,  $\overline{LEBA}$  and  $\overline{OEBA}$

## Logic Diagram

Please note that this diagram is provided only for the understanding of logic operations and should not be used to estimate propagation delays.

**Absolute Maximum Ratings**(Note 1)

|                                                                        |                                      |
|------------------------------------------------------------------------|--------------------------------------|
| Storage Temperature                                                    | –65°C to +150°C                      |

# Physical Dimensions inches (millimeters) unless otherwise noted

24-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-013, 0.300 Wide  
Package Number M24B

24-Lead Shrink Small Outline Package (SSOP), EIAJ TYPE II, 5.3mm Wide  
Package Number MSA24

# Physical Dimensions inches (millimeters) unless otherwise noted (Continued)

N24A (REV E)

**24-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-011, 0.600 Wide  
Package Number N24A**
