What kind of fan you received ? One with blue protection film ? It has more airflow, so it has more efficient to cooling the LP, but at the same time noisy level is up to 30 dB(A)

When will this be available? I'd like to be able to cool down my Panda and be able to take it around with me.

DFRobot Support — Yes, it is possible, but it is better to use two same brand battery, the less difference of the batteries, the better the charging would be.
