Part Number: PR1M4

Panel rivets are made with nylon material to hold duct securely to the panel without corroding, ensuring longevity.

Panel rivets can be easily inserted with use of a specially designed, long shafted panel rivet tool.

Ergonomic design of the tool ensures effortless use when inserting rivets into deep channels or locations difficult to access.

Product Description

HellermannTyton panel rivets are one piece drive rivets that provide a fast, economic means of affixing wiring duct. The rivet is inserted into a 3/16" pre-punched hole and the pin is driven into the base, thereby expanding the rivet legs and locking the duct and sub-panel in place. The panel thickness (including the duct thickness) should be a maximum of 3/16".
