Grove Starter Kit for Photon is an easy to use plug-and-play kit for the Photon - one base shield lets you connect a variety of included Grove modules. It includes a Grove Shield for Photon and several Groves. Grove Shield for Photon is an expansion board, which is more easy for users to build Groves 4-pin standard interfaces from Spark Photon, also avoid the user spent too many cables to build prototype.

Parts list:

- Grove Shield for Photon
- Grove - Button
- Grove - Buzzer
- Grove - Rotary Angle Sensor
- Grove - Temperature Sensor
- Grove - Light Sensor
- Grove - Chainable RGB LED
- Grove - 3-Axis Digital Accelerometer($\pm 1.5g$)
- Grove - 4 Digit Display
- Grove - Vibration Motor
- User's Manual

Documents

Please visit our wiki page (http://www.seeedstudio.com/wiki/Grove_Base_Shield_for_Photon) and github library (https://github.com/Seeed-Studio/Grove_Starter_Kit_for_Photon_Demos) for more info about this product. It will be appreciated if you can help us improve the documents, add more demo code or tutorials. For technical support, please post your questions to our forum (<http://www.seeedstudio.com/forum/>).

Seeed?

Seeed is a hardware innovation platform for makers to grow inspirations into differentiating products. By working closely with technology providers of all scale, Seeed provides accessible technologies with quality, speed and supply chain knowledge. When prototypes are ready to iterate, Seeed helps productize 1 to 1,000 pcs using in-house engineering, supply chain management and agile manufacture forces. Seeed also team up with incubators, China tech ecosystem, investors and distribution channels to portal Maker startups beyond.
