

Standoff - Metal Hex (4-40; 3/8"; 10 pack) Product Help and Resources

SKILLS NEEDED

Core Skill: DIY

Whether it's for assembling a kit, hacking an enclosure, or creating your own parts; the DIY skill is all about knowing how to use tools and the techniques associated with them.

Skill Level: Noob - Basic assembly is required. You may need to provide your own basic tools like a screwdriver, hammer or scissors. Power tools or custom parts are not required. Instructions will be included and easy to follow. Sewing may be required, but only with included patterns. See all skill levels

Beware applying any real torque when installing standoffs. The threaded screw portion will weaken and break off of the rest of the standoff if you apply too much torque. I had this happen on multiple occasions when stacking multiple standoffs and when installing into the big red box screw holes without tapping the hole first.

It would be great if anyone knew where you could find rubberized screws to put in these to use as bumpers to stand on. Im looking to use these so theyll weigh down my arduino and mojo, but Id like some rubber to put on the female part to keep it from sliding around on my desk (which is glass, and metal makes a screeching

Might I suggest applying a small amount of Sugru to the bottoms for a custom solution? You get one pack of the stuff, you have plenty for this use and other handy applications—neat stuff, saw it at Maker Faire.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
