Will these work with the bus blaster ? I have one currently on order (bus blaster) and want to know if I need to add these to my order.

Great product, the quality is nice and the colors are really varied. Mine came with 10 of each color: red, green, write, black and yellow.

Very very useful, saves you from crimping custom cables, if you need several pins at once, you can actually just glue a few of these wires together.
