PROTO Connect Board

PID: MIKROE-319

PROTO Connect Board is used to connect a prototype device to external modules via a screw terminal. External connection is enabled via the screw terminal. Components available on the board are clearly marked, which makes connection easy.

Specifications

Type	Adapter
Applications	Board is used for connecting eight wires from power supply, communication, analog or GPIO lines to the target breadboard
On-board modules	Eight screw terminals and eight connection pads in standard 100mil distance
Key Features	Micro screw terminals for eight wire connections
Interface	GPIO
Compatibility	Breadboard (PROTO)
Input Voltage	3.3V or 5V

Mikroe produces entire development toolchains for all major microcontroller architectures.
Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
ISO 14001: 2015 certification of environmental management system.
OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).
